NEW DISARM™ BECAUSE SPEED IS OF THE ESSENCE.

When you’re faced with the threat of brown patch, gray leaf spot, anthracnose and other turf diseases in your fairways and greens, you need the proven performance of new DISARM™ Fungicide. Unlike most strobilurin fungicides, DISARM features fast penetration of leaf surfaces, rapid translaminar movement and enhanced systemic activity for longer-lasting residual control and complete leaf and crown protection. Plus, it’s rainfast in as little as 15 minutes. Add it all up and DISARM gives you performance that’s equal to or better than the leading strobilurin. To learn more, visit www.arystalifescience.us/disarm or call 1-866-761-9397.

Worries about disease pressure at the end of your spray interval will become a distant memory. Maximize your fungicide efficacy. Maximize your fungicide dollars.

Precision Laboratories has developed the first and only adjuvant created specifically for fungicides — SYNC™ Fungicide Activator. Independent University research data and field trial results show that fungicide combined with SYNC provides improved disease control with greater longevity. SYNC will energize your fungicide performance.

Get the facts for yourself. University research is available at www.precisionlab.com/sync

BASF Means Better Solutions...Which Means Better TURF

The Chemical Company
Why are second chances worth giving? Because so often — more often than not, I'd like to think — the people who receive second chances are sincerely grateful for them.

Take Alan Andreasen, for instance. Just five years ago, he was an over-50, down-and-out and out-of-work superintendent with a bleak future. “I was washed up and over the hill,” the burly Andreasen says in his husky voice.

But thanks to a second chance, the 62-year-old is now a successful and award-winning certified superintendent for CourseCo, the Petaluma, Calif.-based golf course management and development company. And Andreasen is more thankful than anyone will ever know for receiving another chance.

Andreasen has Ray Davies to thank for that chance. Davies, director of golf course maintenance and construction for CourseCo, picked Andreasen off the superintendent scrap heap in 2001 and gave him the job as golf course superintendent at Los Lagos Golf Course and Ranchito del Pueblo Golf Course & Driving Range in San Jose, Calif.

It would have been understandable if Davies had hired some young hotshot superintendent for the job and left Andreasen’s career to the dogs. But the noble Davies took a chance on Andreasen, believing he could succeed.

Andreasen had left his previous job several months before as superintendent of a golf course in the Mohave Desert. But it wasn’t an amicable split and Andreasen didn’t have another job. Andreasen, who began his golf course maintenance career in the 1970s, couldn’t even get a job with the local Kmart’s garden nursery. He “bounced” from job to job, even working for the U.S. Census Bureau for $10 an hour.

Davies, who has known Andreasen for about 25 years, knew of his plight. Ironically, Davies had worked for Andreasen for a few years in the early 1980s as his assistant superintendent at Hacienda Golf Club in La Habra Heights, Calif.

But Davies didn’t just hand the job to his old boss. There were some stipulations. Davies told Andreasen he had to learn new skills if he wanted to work for CourseCo. He told him the profession was much more complex than it was when Andreasen had started, and he had to comprehend its new demands. The job wasn’t just about growing grass anymore, Davies said. It was also about being a teacher, a communicator, a politician and an environmentalist, not to mention an adequate computer user.

For years, Andreasen had resisted being all these things. But now he knew what was at stake — a chance to get back into the game at a great position. He knew he had to shed his skin and become a “modern” superintendent.

He has done so. And Andreasen has received formal and informal recognition from his peers for his efforts. Earlier this year he was named the overall winner of the 2005 Golf Course Superintendents Association of America/Golf Digest Environmental Leaders in Golf Awards and was also the recipient of a Turfgrass Excellence Award from the Northern California Golf Course Superintendents Association.

Recently, Davies promoted him to superintendent of the Green River Golf Club in Corona, Calif. “He’s a star right now,” Davies says.

The praise is wonderful, but Andreasen will tell you that the life experience of having his career resurrected is what he cherishes most. And he knows it never would have happened if he didn’t seize a second chance.

Andreasen isn’t of the warm and fuzzy type, but even he admits his is a heartwarming story.

But it’s not over. Andreasen is now counseling others in the profession who are in the same stale position he once was.

He wants to see them get second chances so they too can try to turn their careers and lives into “modern” success stories.

TALPIRID® The industry’s first & only proven mole bait.

Moles can be one of the most destructive and costly pests golf superintendents face... indiscriminately damaging greens, fairways and tee boxes. The result of more than 4 years of groundbreaking research, TALPIRID can help regain control where no viable options previously existed.

"Great job—thank you for finally researching and producing a great product that by far, is the best product on the market for mole elimination!!"  
- Robert M. Donofrio, Shadow Lake G.C.

"It really does work."  
- James Longhi, Longhi’s Golf

TALPIRID is easy to apply and economical to use. For more information, contact your Turf & Ornamental distributor or Bell Laboratories directly at talpirid@belllabs.com.
TIDBIT OF THE MONTH

Carolina Back on My Mind

After a bit of a lull, large-scale golf projects are active again in the Tar Heel state. Among the most promising are Laurelmore in Darby, a 6,000-acre development that features a Tom Kite-designed course and perhaps another 18; the 390-acre Plantation Ridge at Glassy in Gowensville, with more than 400 housing units and a course designed by Jackson Golf on tap; the Nicklaus-designed 12 Oaks Country Club, the centerpiece of a 600-acre project near Holly Springs; the 773-acre River Oaks in Pittsboro, a Toll Brothers' effort with an Arnold Palmer design; and a massive remodel of Lake Toxaway Country Club by Kris Spence. For details on these and other golf projects around the United States, visit www.golfconstructionnews.com.

Hazard Pay

According to fatality statistics, the following jobs rank as the most dangerous in the country. Golf course maintenance workers didn’t make the list, but they sure have a hand in some of the professions that did.

1. Fishers and fishing workers
2. Logging workers
3. Aircraft pilots
4. Structural iron and steel workers
5. Refuse and recyclable material collectors
6. Farmers and ranchers
7. Electrical power line installers/repairers
8. Driver/sales workers and truck drivers
9. Agricultural workers
10. Construction laborers

Exceptional quality of cut and after cut appearance is the result of the new Reelmaster® 5010 series fairway mowers from Toro®. It's all thanks to a completely new design that's focused on performance, operator comfort, and serviceability. The innovative new DPA cutting units offer simple adjustment along with major advances in reel and bedknife edge retention. The detailed improvements will keep you out of the shop and on the fairway producing the results you've come to expect. After all, beauty lies in the details. To find out more, call (800) 803-8676, or visit toro.com/fairways.
PCNB on the Way Out?
The U.S. Environmental Protection Agency has determined that most uses of Pentachloronitrobenzene (PCNB), an organochlorine fungicide used to treat snow mold on turf, have been found ineligible for reregistration. This means that fungicides containing PCNB will no longer be available to treat turf if EPA’s recommendation takes effect. The EPA’s determination is part of its plan to re-evaluate existing pesticides to ensure they meet current scientific and regulatory standards. The EPA announced a public comment period for its Reregistration Eligibility Decision (RED) for PCNB. Comments had to be received on or before Oct. 2.

Sifford Named Old Tom Morris Winner
Charles L. Sifford is the recipient of the Golf Course Superintendents Association of America’s most-prestigious honor — the Old Tom Morris — for helping to integrate golf beginning in the 1960s. The 2007 Old Tom Morris Award will be presented at the Feb. 27 opening session of the 2007 GCSAA Educational Conference, which will be held in conjunction with the Golf Industry Show at the Anaheim Convention Center in California. The GCSAA also selected Pinehurst Resort to receive its 2007 President’s Award for Environmental Stewardship.

Scott Coming “Home” to Nicklaus
After almost a decade of managing the PGA Tour’s agronomic services, Jon Scott returns to Nicklaus Design to head its worldwide agronomy efforts.

“Coming back to Nicklaus Design is like returning home after an extended time,” Burkart said.

Phil Burkart opened his talk with the bad news about freshwater — that it’s disappearing from the face of the Earth.

“The lack of freshwater will be mankind’s most serious challenge in the 21st century,” said Burkart, the vice president and general manager of Toro’s Irrigation Division. “Accelerated population growth, pollution and climate change are likely to produce a drastic decline of fresh water in the coming decade.”

Without ample water supplies to irrigate our green space and crops, most everyone stands to lose, Burkart said.

“Without water, our children and grandchildren can’t run, play and wiggle their toes in the grass,” he added. “Golf balls can’t roll up and stop on lush fairways. And somehow it just doesn’t seem right to have to take your kids to a baseball game played on Astroturf.”

Burkart, the opening speaker at Toro’s first WaterSmart “Success Without Excess” Symposium held in July at Toro’s Riverside, Calif., facility, wasn’t trying to demoralize the almost 200 people in attendance with such negative statements. In fact, Burkart was trying to do the opposite. Toro organized the event for the leaders and stakeholders in water conservation to rally the troops to conserve water in light of its impending deficiency.

“We believe it’s time to step up and meet the challenge and find a new way for watering techniques,” Burkart said. “There are many irrigation stakeholders who are enjoying incredible success as a result of offering water-saving irrigation programs and strategies.”

With that, Burkart turned over the program to a host of speakers, including Mary Ann Dickinson, executive director of the California Urban Water Conservation Council, a non-profit organization composed of urban water supply agencies, environmental groups and other entities interested in statewide water conservation in California.

Dickinson recited more troubling statistics regarding water shortage and efficiency. “More than 1 billion people lack access to clean, drinkable water, and many children are dying from water-borne diseases as a result of a lack of water treatment,” she said.

An array of speakers participated in the event from different facets of the vast irrigation industry, including Sandy Clark, the certified golf course superintendent of Barona Creek Golf Club in San Diego County.

Phil Burkart
