Dismiss® turf herbicide stops nutsedge before it can hurt your reputation.

Yellow nutsedge, purple nutsedge and green kyllinga can ruin the look of your well-manicured turf. At the first sign of sedges, reach for Dismiss® turf herbicide. You'll see visible results in just 48 hours and get long-lasting control of even the toughest sedges. In fact, a single* Dismiss application may be all you need for season-long control of yellow nutsedge. Plus, you get effective preemergent control of annual broadleaf weeds.

In this business there's no time to wait for weed control. Use Dismiss for results in days. For more information, contact your FMC sales representative or local FMC distributor.

Dismiss. Results Without The Wait.

Taking Sanctuary in Emerging Attitudes - Golf courses are earning credibility as wildlife refuges.
By David Frabotta
Taking simple precautions for the upcoming holidays can ensure a happy, healthy time for you and your dog. Don't feed pets holiday treats or leftovers. Some foods such as chocolates, alcohol, uncooked bread dough, grapes and raisins can be life-threatening. Keep ribbons, tinsel, flower arrangements, electrical cords and holiday decorations away from pets. And don't forget about live trees; place them in a room away from your dog. To stop a Christmas tree from falling over, place a hook in the ceiling and use some nylon yard to attach to the tree. This will prevent falling over.

Jake and Fred Gehrisch, certified golf course superintendent at Highlands Falls Country Club in Highlands, N.C. (Photo by: Lynn Delgado)

Today millions of golfers are unable to play the game they love. SoloRider enables them to play and helps bring them to your course.

**THE SAFE SOLUTION**
For the mobility-impaired golfer and golf course operators as well, safety is always a critical consideration. That's why SoloRider was designed to be the safest ride in golf. From the stability provided by our independent suspension to the patented stand-up seat, SoloRider helps players concentrate on their games without worrying about the ride.

**THE SMART SOLUTION**
SoloRider has invested more than a decade of research and development into an award-winning golf car. The result is a sophisticated yet rugged vehicle loaded with proprietary technology that's hand-built to meet a rigorous quality control inspection. It's all part of our uncompromising commitment to design and engineering excellence.

**THE PROFITABLE SOLUTION**
Accessibility is important, but so is increasing rounds. SoloRider not only helps you comply with accessibility guidelines, it also creates incremental revenues because it brings new players to your course, including seniors with limited mobility. As your tee sheet grows, so does your return on investment.

Safe, smart and profitable. SoloRider is right for the times and good for your business.

They’re out there, they’re just hard to find. But I happened upon one recently — a person with a heart of gold. And this person, who has a heart the size of Augusta’s 18th green, just happens to work in the golf industry.

Her name is Doris Evans, and she’s the executive director of The First Tee of Cleveland, a chapter of the national organization established in 1997 to help youths from all walks become acquainted with golf. With the holidays upon us, I thought it was appropriate to write about Evans, whose life exemplifies the spirit of the season — giving to others.

In addition to her duties at The First Tee, Evans is also a pediatrician. She became a doctor to help children. She became executive director of The First Tee of Cleveland to do the same. Someday, Evans’ legacy will be simple to define. “She cared for kids,” people will say. But it runs much deeper than that. Caring for kids is her passion — her goal in life.

There’s a definitive connection between Evans’ career as a pediatrician and her role in The First Tee. As a pediatrician, Evans says she has a strong interest in the psychological development of children. As the head of Cleveland’s First Tee, her main aim is to build character in children. Evans didn’t take the job three years ago just to teach children how to play golf.

“My passion is to grow the children ... to see that they reach their potential,” she says.

I had a long conversation with Evans recently during The First Tee of Cleveland’s annual awards luncheon, where citations were handed out to young golfers for honesty, integrity, respect, sportsmanship and courtesy, among other attributes the organization embraces in its core values to help build character in young golfers. Evans reminded me that The First Tee is not just a program to bring new players to the game.

“It’s a youth-development program that uses golf as a platform to grab the kids’ interest and allows them to have fun while they’re learning life skills,” she says.

Incidentally, Evans is a marvelous golfer.

She discovered early in her life she had a talent for the game. She played competitive junior golf while growing up in Chicago and entertained thoughts of turning pro. She decided to pursue her calling, though, of becoming a doctor, something she envisioned since she was 5.

But Evans didn’t want to be a doctor who just helped physically ill and injured patients get better and get on their ways. So she became a pediatrician and concentrated on the psychological and sociological development in children. Evans wanted to prepare children to steer down the rocky road that is life.

So while Evans, who still sports a 12 handicap, can be seen providing the students of The First Tee program with tips on how to drive a ball squarely off the tee, her main objective is to teach them about the organization’s core values. “I want them to internalize these core values and to build on them ... to keep them away from the traps of life so they can then reach their potential and grab that brass ring,” she says.

If the children who come through The First Tee of Cleveland are still playing golf in 20 years, Evans will be happy the program helped grow the game. But what matters most to her is the children go on to lead productive lives by practicing the life skills they are taught.

Evans smiles when she talks about the “turnaround stories” the program has had. There were troubled youths — ones headed down the road to ruin — who were able to straighten out their lives thanks to the lessons they learned through The First Tee.

“That’s the payoff ... that’s my vision for this program,” Evans says.

What she says is from the heart — a heart of gold.

New Golf Course Developments in the 'Old Line State'

Though a few proposed golf courses have been dealt losing hands by opposing environmental groups, several projects are underway or in planning in Maryland. A major remodel is slated to begin next spring on the George Cobb-designed University of Maryland Golf Course in College Park. The $2.5-million project will refresh most of the layout. Architect Dan Schlegel has been hired to oversee a master plan to create a new course at Fort Meade, a project mandated by the National Security Agency, which wants to move its headquarters onto the two 18-hole layouts within this 5,400-acre military preserve. Davis Love III is overseeing a major remodel of TPC of Avenel in Potomac. And in Harwood, Sallie Mae Chairman Alfred J. Lord is completing his exclusive Greg Martin-designed course at Anne Arundel Manor. For details on these and other golf projects around the United States, visit www.golfconstructionnews.com.

A Good Place to Work — And Warm Year-Round

Forbes.com recently released its annual list of cities that will have the highest and lowest job growth in the next five years. On the plus side, five Florida cities occupy the top-10 spots, which are:

1. Cape Coral, Fla.
2. Las Vegas
4. Sarasota, Fla.
5. McAllen, Tex.
6. Port St. Lucie, Fla.
7. Riverside, Calif.
10. Phoenix

The worst cities for growth are:

1. New Orleans
2. San Jose, Calif.
3. Hickory, N.C.
5. Detroit
8. Binghamton, N.Y.
9. Canton, Ohio
10. Dayton, Ohio

Slow-release Nitroform® fertilizer has made quite a positive impact on Superintendent Randy Moody and his dog, Angus, at Georgia's Longshadow Golf Club. "It's consistent, with no surge growth or flushes, so we save time and labor," says Randy.

"I heard Nitroform® fertilizer gets really high scores in tests by independent labs—that includes me."

— Angus, Randy Moody's Black Lab

When It Comes To Turf Quality, Ask Those Closest To It.

To please the players on your course—both the two- and four-legged kinds—ask your Agrium Advanced Technologies rep or call 800.422.4248. Tell us what your dog thinks at agriumat.com/dog and win great prizes for you and your pooch!
Santa Ana winds pushed wildfire across I-15 and through the Pala Mesa Resort. Luckily, the only turf damage was around the perimeter, but plenty of trees perished.

were lost were, of course, my maintenance facility with all my equipment and the human resources/accounting building,” he said.

All of the resort’s equipment burned in the inferno, including his central control system for irrigation. He had just overseeded wall to wall, so he was in a bit of a pickle.

Luckily, Toro overnighted him a new system, and Turf Star created an irrigation program for him.

In addition, Turf Star, Golf Ventures West and AA Equipment offered loaner equipment to get him mowing again.

Damage from the 23 fires is expected to exceed $2 billion. Thousands of people in the San Diego area have begun rebuilding their homes and lives.

And some will send thank-you cards to the Rancho Bernardo golf course maintenance crew.
