Since the Beginning

Since the introduction of Penncross, superintendents around the world have come to trust Tee-2-Green and the Penn bents.

How many superintendents do you know with the Penn bents on their course?
Correction: In the article titled “One-Two Punch” in the April issue of Golfdom, we gave the impression that Tartan fungicide, from Bayer Environmental Science, would control Pythium. However, Tartan is not registered for Pythium control. Chipco Signature fungicide, which also contains StressGard technology, is registered for Pythium control.

About the cover
Senior Editor David Frabotta found Mark Woodward near the fourth fairway at Torrey Pines. Woodward lost a mower off the cliff just a few feet from where he's standing, but the operator bailed out in time. That's some occupational hazard.

Turfgrass Trends
This month, Golfdom's practical research digest for turf managers discusses recycled wastewater and fertigation, among other topics. See pages 63-76.

Like a lone sentry, it stands guard on every hole.

WATCHING ALL.

Witnessing greatness and failure alike.
Joy and anguish.
It will be leaned against.
It will be used to hold cigars.
Over it, jokes will be told, business deals will be cut and bets will be won and lost.
It will be there when a golfer holes out in one.
And yet, nary a thought will be given to it.
Unless, of course, it wasn’t there.
Exercise is a very important part of keeping your dog healthy. It keeps his muscles, heart, lungs and bones strong and healthy. It's also fun for your dog. Playing fetch, Frisbee, and hide and seek are some of the more popular choices. Swimming can be a great way to exercise your dog and will keep him cool during hot summer days. But just be careful if you take your dog to the beach. Be sure to bring him some drinking water, as drinking sea water will make him very sick.

Quali-Pro® products feature formulation quality second to none for performance results equal to the competitive brands they replace.
Unless you’ve been living under a fairway mower for the past month, you’ve heard about Golf Digest’s “How Green Is Golf?” report in the magazine’s May issue. Golf Digest billed the 30-page section as “The Most Important Article We’ve Ever Published.”

If you haven’t read the piece, which focuses on golf and the environment, please take the time to do so. Some parts are very good. The piece is posted on Golf Digest’s Web site.

But after reading the report, written by John Barton, you might conclude that Golf Digest doesn’t do golf course superintendents any favors when it comes to promoting their image as environmental stewards.

In the article, Barton takes Augusta National Golf Club to task for its alleged conditioning practices. Barton writes: “Like the fur coat and the SUV, the ‘Augusta look’ — freakishly green wall-to-wall grass on a life-support system of too much water and toxic chemicals, greens running at virtually unplayable speeds, ornamental flowers all over the place — will become less admired, and even stigmatized.”

Ouch!

Before I comment on Barton’s take on Augusta, let me point out that Golf Digest ranked Augusta National No. 3 (behind Pine Valley Golf Club and Shinnecock Hills Golf Club) in its 2007-2008 America’s 100 Greatest Golf Courses list. One question: Just what does Golf Digest admire about Augusta to rank the course so high?

Back to Barton’s comments. In his rant against Augusta, Barton basically accuses Augusta superintendent Brad Owen and his staff of over-irrigating and spraying loads of dangerous chemicals to achieve abnormal-looking turf. How does Barton know this?

The bet here is that Owen, like all responsible superintendents, uses chemicals safely and water judiciously. Regarding his pesticide use, it can be assumed that Owen is using the best brand-named products money can buy because his massive maintenance budget can afford it. Many of the new pesticides, by the way, are also safer and have much lower use rates.

Regarding irrigation, who cares if Owen may have went to the well a little more than he should have for Masters week? Let’s not forget that the Masters equates to dollar signs with many zeroes attached to them. It’s big business for golf, not to mention the local economy of the tiny town of Augusta. If Golf Digest wants to single out an entity for wasting water, it should point the finger at the guys who wash their SUVs twice a week — and leave the hoses running while doing so.

In his article, Barton also suggests that golfers turn into activists at the courses they play and lobby superintendents to reduce water and pesticide use. Superintendents across the country probably cringed collectively upon reading this.

Yes, if Carl Spackler is turning a golf course into a noxious dump by applying fungicides, herbicides and insecticides daily, the golfers ought to talk to him about cutting back his pesticide use. But I would hate to see golfers cornering someone like Merion Golf Club’s Matt Shaffer, one of the best and brightest superintendents in the business, to grill him about his pesticide use on the golf course. That wouldn’t be fair to Shaffer and other alike superintendents, who should be trusted in such capacities, not questioned.

Barton also writes that golfers should “support your golf course superintendent, who too often is treated as a second-class citizen, sequestered somewhere out of sight in ‘the shed.’ ” Come again? This statement might have been true 25 years, but not today. Most superintendents are much more respected in 2008.

The moral of the Golf Digest story: While Barton calls superintendents “experts” and advises golfers to get to know them, he inadvertently bashes them throughout the piece.

Like I said, the Golf Digest article does superintendents no favors. So much for the industry getting a boost from the mainstream media.
The Smithco Spray Star is designed for one thing: to deliver the precise application of liquid chemicals to greens, tees and fairways. SPRAY STAR is synonymous with CONTROL. Control of ground speed and control of any desired application rate.

- **Hydraulic drive for infinitely variable ground speed**
- **Constant spray pump delivery at any ground speed**
- **Stainless steel ultra high-volume pump**
- **Leak-proof o-ring seals throughout the chemical spray system**
- **Self-cleaning stainless steel strainer**
- **Superior “quad-jet” agitation**
- **Optional “Safe-Fill” chemical loading**
- **Open design for easy service access**

The Smithco Spray Star is the most advanced sprayer made. (At least on earth.)

Hydraulic drive for infinitely variable ground speed

- Constant spray pump delivery at any ground speed
- Stainless steel ultra high-volume pump
- Leak-proof o-ring seals throughout the chemical spray system
- Self-cleaning stainless steel strainer
- Superior “quad-jet” agitation
- Optional “Safe-Fill” chemical loading
- Open design for easy service access

**Spray Star 1750**

- **MOST MANEUVERABILITY** of any midsize spray vehicle.
- **MOST POWERFUL** of any midsize spray vehicle: 31 hp/23 kw (gasoline) or 34 hp/25.5 kw (diesel) engines.
- **THE SAFEST SPRAY VEHICLE MADE** thanks to its certified ROPS and available Safe-Fill system for handling chemicals.
- **ULTRA HIGH-VOLUME CENTRIFUGAL SPRAY PUMP** provides superior agitation for any spray material and massive volume to supply spray nozzle.
- **CERTIFIED OSHA, ANSI** and all applicable US and British standards for safety.

GOLF DATATECH

Energy Kick

It's June and golf play is in full swing around the country. Needless to say, golf course superintendents and their crews are working some long days and long hours. Hence, they need their energy. According to Health magazine, here are some things you can do to boost your energy.

- **See the light** – Get the right light, and you'll have lots more energy. Sunlight is best because it contains brain-activating short-wavelength blue light. This bodes for superintendents and their crews, who are outside often.

- **Eat meat** – Eat protein products, plant- and animal-based, throughout the day. Protein increases mental alertness and energy. Too many carbohydrates, such as breads and sweets, can make you sleepy.

- **Meditate** – Take a few minutes to meditate throughout the day. It can boost your alertness.

- **Clean up your sleep** – To help get a good night's sleep, fully darken your bedroom, regulate room temperature and use white noise such as a fan to help you sleep.
The first and only valve-in-head family of golf rotors that is completely serviceable from the top.

Leave your shovels behind.

Rounds Down in March, As Is Consumer Confidence

Is it a coincidence that golf rounds played were down nearly 10 percent from the previous year at the same time that consumer confidence has been sinking?

Rounds played in the United States were down 9.9 percent on same-store basis in March 2008 versus March 2007, according to the National Golf Foundation. Even with one extra weekend day in March versus last year, most regions doing relatively high volume in the month were down: Central/South Florida fell 3.1 percent; the Gulf Coast declined 1.8 percent, and South Central showed a 8.5 percent decline.

Consumer confidence has experienced a similar slump. The Conference Board Consumer Confidence Index, which had declined sharply in March, fell further in April. The Index now stands at 62.3, down from 65.9 in March. The Present Situation Index fell to 80.7 from 90.6. The Expectations Index was virtually unchanged, 50.1 versus 49.4 in March.

Home Depot Canada Phases Out Pesticides

Even though it’s another country and another segment of the green industry, golf course superintendents should know that Home Depot Canada plans to voluntarily stop selling traditional pesticides and herbicides in its stores across Canada by the end of 2008 and increase its selection of environmentally friendly alternatives.

“Like our customers, we at The Home Depot, are concerned about the environment,” said Annette Verschuren, president.
