WARNING

FLORATINE’S TURF ACTION PLANS WILL CAUSE HEALTH TO BREAK OUT

Turf Action Plans from Floratine provide a convenient, economical and targeted solution for many common yet challenging turf issues. Our TAP Packs are pre-measured for easy use, each TAP Pack covers up to one full acre and protects against stress and disease, while promoting plant nutrition for the strongest turf. To learn more about a Turf Action Plan that's right for you, talk to your local Floratine distributor or visit www.floratine.com.

Solutions that fit any turf disease problem.

When it comes to nasty turf diseases and the problems they create, Bayer has the solution. Products that will prevent or control tough turf diseases like dollar spot, brown patch, and anthracnose, quickly and effectively. Therefore, keeping your course beautiful and green and your reputation golden. And all our products are Backed by Bayer™ and all the science and support that come with it. For more information ask your Bayer Field Sales Representative or visit us at BackedbyBayer.com.
With spring just around the corner, it's time to think about the inevitable nuisance: weeds. To assist in prevention, use a selective pre-emergent herbicide for control of annual grasses and broadleaf weeds in turf and ornamentals. Bermudagrass then succumbs to the combination of herbicide effects and winter kill.

There are disadvantages to this program. One is cost. Another problem is that the 4 oz/A rate of mesotrione and 32 oz/A rate of Turflon Ester (triclopyr) that we used would exceed annual use rates if the products are broadcast applied to the target area. Obviously, being a six-application program, simply treating six times will not be cheap or easy. Data suggest that stretching application intervals or missing applications will greatly reduce the effectiveness of these treatments. So sticking to the timings outlined above is a necessity. These treatments would be more economical and likely less injurious when spot applied instead of broadcast applied.

The best treatment was fenoxaprop-P plus triclopyr plus mesotrione. This combination reduced bermudagrass cover from 71 percent when the study started to 2 percent when evaluated mid-summer in the next season. The majority of the plots treated with this combination were completely free of bermudagrass. No previous selective bermudagrass control program has reduced bermudagrass populations this much in one growing season. Although this strategy does not affect bermudagrass in summer for about two months, we speculate that spring applications provide enough initial suppression to limit active growth through most of the summer, and then fall applications completely deplete energy reserves in rhizomes and stolons. Bermudagrass then succumbs to the combination of herbicide effects and winter kill.

John Willis is a research associate and Ph.D. candidate in turfgrass weed science at Virginia Tech in Blacksburg, Va.

Shawn Askew is associate professor of turfgrass weed science in the department of plant pathology at Virginia Tech. He is also Virginia's extension specialist for turfgrass weeds. For more information, visit his web site at www.turfweeds.net.
Some Say Audubon Programs are for the Birds...

Exactly. But our 2200 member courses know that our programs are also about saving money, reducing risk and liability, improving course performance, enhancing your image and reputation, and attracting golfers.

You already know that Audubon International programs help wildlife and lead to a cleaner, healthier environment, which is good for nature. But as our members will tell you, it’s good for business too.

Audubon Cooperative Sanctuary Program and Audubon Signature Program... naturally good for golf!

Find out how to take action and join the growing number of members benefiting from Audubon International programs. Call or visit us today.

**Leaders**

**PEOPLE ON THE MOVE**

**Tom Vlach** will become the new golf course superintendent at the PGA Tour flagship TPC Sawgrass, home to The Players Championship. Vlach’s new responsibilities will begin after the tournament in May, upon the retirement of long-time golf course superintendent **Fred Klauk**, who worked for the PGA Tour for 27 years. Klauk will assist in the transition and remain active with the PGA Tour in a project-management capacity.

**David Buth** is the general manager of the new Venetian Bay Country Club near Daytona Beach, Fla., a KemperSports-managed property. Buth formerly directed golf operations at Suntree Country Club in the Greater Orlando.

FarmLinks hired **David DeWeese** as golf course superintendent at FarmLinks Golf Course, a research and demonstration facility. DeWeese comes to FarmLinks after four years as assistant superintendent at Willow Point Golf and Country Club in Alexander City, Ala.

**Steve Zwilling**, the Eastern U.S. market development manager for PROFILE Products LLC, was unanimously voted to join the board of directors of the Mid-Atlantic Chapter of the International Erosion Control Association.

Southern Land Co. LLC has named **Glynn Taylor** director of the Westhaven Golf Club, which officially broke ground in August. The Club, which is slated to open in spring 2009, also recently concluded its first release of memberships by welcoming 200 Charter Members. Most recently, Taylor was vice president of golf at Fairvue Plantation.

**Chris Buckle** joined the E-Z-GO and Ransomes Jacobsen sales team and will be responsible for golf car sales and territory development in the south of England and Wales.

Marriott Golf promoted **Tom Farris** to director of golf at Westfields Golf Club, an 18-hole Fred Couples designed course in Clifton, Va. Farris has served as the head golf professional at Westfields since 2004.

Valent Professional Products restructured its sales force and added **Kerry Anderson**, **Quent Baria** and **Jim Santoro** as territory managers in the Midwest and Atlantic regions. **Mark Sybouts**, a current Valent territory manager for the ornamental and turf markets, will work full-time with Midwest as a result of the restructuring. Anderson and Santoro join Valent from Bayer’s Environmental Science Division. Baria is a certified golf course superintendent and was previously the head golf course superintendent for Towson Golf Course & Country Club in Phoenix, Md.

Visual results in 24 hours and dead clover in as little as a week. That's the kind of performance you can expect from a precision product like SpeedZone.

University tests, field trials and turf managers have demonstrated consistently fast control of tough weeds such as clover, plantain, ground ivy and spurge. And dandelions are blown away!

Get your weed control program on the fast track with SpeedZone® Broadleaf Herbicide for Turf.

- Low odor
- Excels in cool-weather
- Rain-fast in 3 hours
- Reseed in 2 weeks

As pressure from my better half rose, I ended up with a new kitchen floor for around $300 and a day’s labor. If I had chosen hardwood, it would have run me at least $1,200. The laminate companies will tell you their floors are easier to clean, last longer and can be fixed easily. They are right. It takes but water to clean a laminate floor, so say goodbye to funky waxes, expensive polishers or special mops. But the real advantage: installation’s a tongue-and-groove snap.

With the trusty help of my mother’s husband, Rory, a true handyman, we knocked out the floor, including cutting a door, in about eight hours. However, before you dive in willy-nilly, a few things to keep in mind.

Like any home-improvement project, preparation remains paramount. Thoroughly clean the surface the laminate will go over, and put down (very flat) a foam underlayment, which will dampen noise and soften the feel of the floor. Make sure you have 10 percent to 15 percent more flooring than you will need. Draw up a diagram, complete with measurements, to provide a rough guide to how you will proceed.

Secure the proper accessories. Most home-improvement stores will offer a set of tools you need to successfully install the floor. These include a pull bar, a tapping block and spacers. In addition, if doors are present, you will need a jamb saw to cut the bottoms of door jams to fit the floor.

Stagger the planks. You don’t want all the seams in the same place, so cut three or four different lengths and then proceed.

Work as a team. One person should do all the cutting (on a table saw), one person should do all the measuring, of course, with the same tape. Double-check all measurements and communicate.

Working around doors and corners can be tricky, and thresholds can be tough to match. Be patient. You will make mistakes, but they are easily resolved.

By no means will this guide do your work for you, but it will put you on your way to re-inventing nasty old floors.

Mark Luce lives in Kansas City, Mo., where his next trick will be learning to construct bookcases for his kids’ rooms.
