Greens Damage Drama at PGA Championship

By Seth Jones

JOHNS CREEK, GA. — All week the players had been raving about the conditions at the 93rd PGA Championship, especially the perfection of the new Diamond zoysia fairways, at the Atlanta Athletic Club. But a Wednesday night mishap suddenly stole the headlines, and the maintenance crew found themselves on the Golf Channel at a moment they’d rather not have been seen.

Two greens mowing mishaps gouged two different spots on the No. 14 green. Yes, two different mowers, within moments of each other, both had mishaps. Another mishap strangely happened a short while later when the crew had moved on to the No. 17 green.

“Something occurred that I’ve never seen before and I can only speculate on what happened,” Ken Mangum, director of golf course and grounds, told the world via a Thursday press conference broadcast live on the Golf Channel. “Nothing mechanical. No operator error... and we’ve checked the mowers, we’ve checked the people, we’ve checked everything.”

The only answer Mangum could think of was that a spike in humidity Wednesday evening caused the mower brush to grab and dig into the green. When Mangum arrived at the 14th green to survey the damage on Wednesday evening caused the mower brush to grab and dig into the green.

When Mangum arrived at the 14th green to survey the damage on Wednesday at approximately 7 p.m., the look on his face was sheer terror.

He didn’t scream or shout, though — he went into damage control mode and looked for a way to fix it.

The crew quickly went to the driving range with a sod cutter and took some of a target green to replace the damaged areas. Within an hour the areas were fixed with new turf.

“We got some sod. Sod it, water it, tamp it down, go home. You won’t even be able to tell it happened,” Kasey Kauff, superintendent of the Highlands Course at Atlanta Athletic Club, told Golfdom that evening. The damaged areas were played as “ground under repair” (Rule 25-1) for the entire championship.

Overall, players raved about the course condition. “I don’t think we’ve played a course in this good of shape all year,” Jim Furyk told Golfdom on Tuesday before the championship. “You have to stand on a fairway to see. They’re like carpets.... It’s as good of fairways as I’ve ever played on, ever.”

Mangum was proactive against further incidents by removing the brushes from the greens mowers.

“It’s a little bit like cutting yourself with a razor on your wedding day,” Mangum said. “But it’ll be fine, and our team did a great job of repairing it.”
When it comes to providing players the greenest, healthiest looking high-quality short cut turf, nothing is better at helping you than the A+ Complete Turf Health System from The Andersons. We help you get your turf the greenest and help you keep it that way the longest.

The A+ System was designed to work both above and below the soil surface to maximize performance on the whole plant. The integration of rapid dispersible granules – Contec DG® – with our proprietary Foltec® foliar applications delivers the long-term nutrients needed to attain and sustain optimum turf health.

DuPont Addresses Imprelis Issues with New Web Site

In a proactive move, DuPont has created a Web site for those in the lawn care industry who are concerned about the company’s herbicide Imprelis. The new Web site, www.Imprelis-Facts.com, was created in response to public concern that the herbicide, used for broadleaf weed control on golf courses, sod farms, athletic fields and other turfgrasses, may inadvertently be harming trees.

With the Web site, DuPont says it intends to make it easy for customers to report their concerns with and acquire the latest news about Imprelis.

“DuPont is fully committed to making sure that our valued customers are satisfied with our products, and to ensuring the responsible stewardship of those products,” the company emphasized in its welcome letter on Imprelis-Facts.com.

“We regret any injury to trees that our herbicide, Imprelis, may have caused,” the letter continued. “We have reached out to lawn care professionals who have reported concerns, and are committed to working with them to promptly and fairly resolve any problems associated with those products.”

Customers can report concerns with Imprelis in the “Contact Us” section of Imprelis-Facts.com. DuPont says it also plans to launch a toll-free hotline on Monday, August 1, and encourages customers to check the Imprelis-Facts Web site for updated information.

Jacobsen tapped for Old Tom Morris Award

PGA Tour winner and esteemed golf course designer Peter Jacobsen has been chosen to receive the 2012 Old Tom Morris Award by the Golf Course Superintendents Association of America (GCSAA).

The award will be bestowed during the 2012 GCSAA Education Conference at Celebrate GCSAA!, presented by Syngenta, Feb. 28 in Las Vegas.

“Peter has done much for the game of golf, and he has been an advocate for golf course superintendents,” GCSAA President Robert M. Randquist, CGCS, stated in the association’s press release. “He has also been quite giving of himself for charitable events. He is a perfect fit for the Old Tom Morris Award.”

GCSAA’s most coveted accolade, the Old Tom Morris Award is presented annually to one who “through a continuing lifetime commitment to the game of golf has helped to mold the welfare of the game in a manner and style exemplified by Old Tom Morris,” the association stated in the release.
This much power and torque you simply have to see to believe.

Increase your productivity with the new, multi-function Reelmaster® 7000-D.

**One video is worth 1,000 words.**
A unique combination of a precision reel mower for manicuring your fairways or roughs, and brute power for making quick work of overseeding preparation. Visit youtube.com/toro to see why our customers have taken to affectionately calling the new Reelmaster 7000-D “The Beast”!

**Extreme versatility.**
The Reelmaster 7000-D and patented Dual Precision Adjustment (DPA) reels can be quickly and easily configured for fairways, roughs or overseeding. An impressive 121-inch width of cut and ample muscle to power through even the most extreme conditions make it a productivity monster!

**Built to take the heat.**
When things heat up under the hood, the Reelmaster 7000-D fights back with our exclusive SmartCool™ technology. It automatically reverses the cooling fan to blast chaff and debris from the air intake screens, so you can keep on mowing without interruption.

**Easy on your operators.**
The more comfortable your operators, the more productive they’ll be. So we designed the operator’s station with an adjustable seat, air-ride suspension and an ergonomic ControlHub™ with fingertip electronic controls for all-day productivity.

**The right choice.**
Experience the power of the Reelmaster 7000-D for yourself. To request a demo on your course or learn more call 800-803-8676 today.

Knock out multiple weeds in a single round.

Only Solitare® takes on crabgrass, sedges and broadleaf weeds with no tank mixing required.

When multiple weeds gang up on you, there’s just one solution you need in your corner: Solitare® herbicide from FMC Professional Solutions. Solitare is the only all-in-one postemergence treatment designed to help you control crabgrass, sedges and tough broadleaf weeds all in a single, fast-acting application.

Dual-action Solitare controls or suppresses over 60 weeds without the hassle and cost of tank mixing. Underground, Solitare fights seeds and tubers to reduce weed populations this season and next. For more information on Solitare herbicide, visit www.fmcprosolutions.com or contact your FMC Market Specialist or local FMC Distributor.
