ZAP Warm-Weather Weeds

Spurge, knotweed and clover are no match for the power of Surge® Broadleaf Herbicide For Turf. Energized with sulfentrazone, Surge has the power and speed to knock out tough broadleaf weeds fast. And it even suppresses yellow nutsedge! **Visual results in 48 hours!**

Your members will be pleased with the speed and performance. You'll be pleased with the economy of Surge's water-based amine formulation!

**Put the power of Surge to work for you this year!**

- Energized with Sulfentrazone
- Warm Weather Weed Control
- Rain-Fast in Just 6 Hours
- Yellow Nutsedge Suppression
- Labeled for Centipedegrass
- Low Odor

Becker Underwood, the expert in colorant technology, offers a complete line of innovative products to help keep your pond clean, clear and healthy.

- **Admiral® Algae and Aquatic Plant Growth Control**
  Controls growth of several types of aquatic weeds and algae while aesthetically enhancing the appearance of the water.

- **Black Onyx™ Lake and Pond Colorant**
  High-concentrate colorant that creates a natural, mirror-like appearance often associated with black-colored water.

- **Lake Colorant WSP® Blue Lake and Pond Colorant**
  Premeasured, water soluble packets evenly disperse throughout the water, resulting in a natural blue color.

- **LakePak® WSP® Biological Clarifier and Deodorizer**
  A proprietary blend of beneficial microbes effectively degrades excess nutrients to reduce foul odor and sludge in water for crystal-clear results.
April was a crazy month, and about the best thing you can say about it is that it’s over. I travelled the States extensively in April and early May. Six trips in seven weeks. I went to Scottsdale, Ariz.; Atlanta and Augusta, Ga.; Cleveland; Washington, D.C.; Asheville, N.C.; then finally Charlotte, N.C. before returning home to Lawrence, Kan.

At almost every stop I met a superintendent or two who was in some state of disgust with the weather, with gas prices, with labor, with budgets.

I was also on the phone a lot, and heard even more telling stories there. A superintendent in Portland, Ore., told me that they had just endured the coolest, wettest April they had ever had. They know wet weather in Portland, but only four days with temperatures above 60 degrees? That just steps right on the throat of progress early on in what is going to be an important season for many golf courses.

The most telling story I heard was from a northern superintendent. We were having a nice conversation, but when I turned the conversation to “how’s business up there?” his tone took a sudden sharp turn.

“It’s just terrible – absolutely awful,” he growled.

He told me their April was brutally cold. The biggest slap in the face had just happened to him that day. It was the next-to-last day of April, and the course was hosting the local chamber of commerce for a golf event. The weather started off cold and then turned colder, finally spitting snow at the shivering golfers.

The chamber of commerce waved the white flag and took their members into the clubhouse for an early lunch. The superintendent was beside himself. “Even the chamber of commerce can’t pretend that they want to golf in the weather we’ve been having,” he groaned.

The Ohio Turfgrass Foundation sent out a press release stating the severity the cool, wet April was having on turf where most of the Golfdom staff calls home. In many parts of the country the wet weather was pushing rivers beyond their limits. And in Texas, Oklahoma and parts of Arkansas and Louisiana, record drought.

It’s not just the weather but also the economy. One superintendent told me that a few corporate events he used to count on at his course were once again cancelling. “Give us one more year to get back,” they were telling him. Throw in those other outlying factors like rising gas prices, and you know even better than I do that this golf season stumbled in April.

Worst of all were the 300 tornadoes that wreaked havoc and killed hundreds in Tuscaloosa, Ala., and surrounding areas. It’s like the bumper sticker reads: What’s next? Gravity?

One of my favorite non-bumper sticker quotes is from sausage king Jimmy Dean. Dean was also known to sing a mean country song, but in my book, he’s famous for producing the best breakfast sausage for what we call the “Jonesy scramble” at my house.

Mr. Dean once told a reporter for Esquire magazine, “You have to test your luck every day, because you might be walking around lucky all day and not even know it.”

The good news is that April always leads to May. May 1st brought the breathtaking news of something I’ll always remember: the announcement from President Barack Obama that Osama bin Laden was dead, shot twice by Navy Seals. How’s that for starting a month off with a bang?

Superintendents across the country knew that they were in fact not lucky in the month of April. But the U.S. Open is right around the corner, signaling the most productive time of the year for golf. The news is even talking about gas prices dropping in the next few weeks.

So do like Mr. Dean said, and keep testing your luck every day. Eventually, it’ll turn around. And when it does, you want to be ready.

LIKE DEAN SAID,
“YOU HAVE TO TEST YOUR LUCK EVERY DAY, BECAUSE YOU MIGHT BE WALKING AROUND LUCKY ALL DAY AND NOT EVEN KNOW IT.”

Fairways that look so good your golfers will want more of them.

Concert® II fungicide is formulated to bring greens-grade quality to your fairways. Its broad-spectrum control offers protection against the most difficult turf diseases, including dollar spot, anthracnose, and gray leaf spot. The expanded label even includes landscape ornamentals. With contact and systemic activity as well as the active ingredients found in both Daconil® and Banner MAXX® fungicides, Concert II lets you give your fairways the care they deserve.
WASHINGTON, D.C. — The positive energy was palpable during the recent National Golf Day activities on Capitol Hill, when golf’s main organizations converged to engage members of Congress with powerful messages of the game’s impact on their constituents.

We Are Golf, a coalition of the industry’s top organizations, including the GCSAA, CMAA, NGCOA, PGA of America and the World Golf Foundation, is determined to put a face on the game.

“We’re trying to let Congress know that when they make decisions on golf, to use us as a resource so we can pro- vide them the necessary information so that they’re not just making a decision in a vacuum,” Rhett Evans, GCSAA CEO, said.

Jay Goughnour, owner and superintendent of Raccoon Valley Golf Course in Jefferson, Iowa, was there to talk disaster relief for golf courses. His nine-hole course was devastated by flooding in May of 2008.

“When natural disasters affect golf courses, courses should be treated like other small businesses and placed in the same playing field,” he said.

Goughnour wants Congress to know that golf faces the same hardships as any other business in this economy. “There are a lot of courses that struggle to make ends meet. They employ a few people and they’re great meeting places and valuable assets to the community, but they’re not rich people. I own a nine-hole golf course and I can promise you I’m not rich. I’m just a hard-working individual.”

Mike Barrett, CGCS, has been the superintendent at Argyle CC in Silver Spring, Md., for 15 years. For Barrett, We Are Golf’s mission to put a face on the game is a key point. “I tell people that the survival and success of Argyle Country Club is paramount to me. It’s how I make my living, how I support my family. I have 15 guys. That’s how they support their families. People lose sight of just how important golf is. It creates jobs.”

“When you look at politics, it’s really local,” Evans said. “There needs to be a grassroots effort. Just think what that would do to spread the word even that much faster. And that can be done. It just takes some folks who are motivated.”

Folks like the group of superintendents who served their profession in the nation’s capital on National Golf Day.

Tim Connolly is the assistant superintendent at TPC Potomac at Avenel Farm in Potomac, Md.
Over the last 14 years, over 300 courses have had their greens converted to CHAMPION by Champion Turf Farms

AFFORDABLE
Savings of hundreds of thousands of dollars compared to conventional reconstruction

MINIMAL DOWNTIME
We routinely get courses back in play in less than 2 months – minimizing the greatest cost of performing a renovation – loss of play

INCREASED ROUNDS
Most of our clients report significantly increased numbers of rounds/increased revenues after converting their greens to Champion

AGRONOMICALLY SOUND
We have identified the rootzone properties that work best with the growth habit of Champion and we test your existing greens to compare against these parameters

GUARANTEED RESULTS
We conduct the necessary evaluations and testing as well as performing every installation ourselves to ensure your successful outcome

LONG TERM SUCCESS
Greens we installed over 14 years ago have retained their purity and still perform well today

THE BEST PUTTING SURFACE
No other bermudagrass can create the same ball roll as Champion. The growth habit of Champion combined with the correct system of agronomic management allows you to have putting surfaces that are second to none.

Specializing in Bermudagrass Greens since 1966
Gib Fox and his family huddled in a makeshift teepee in the center of their living room. Fox’s two young children were oblivious to what was happening. But Fox and his wife knew darn well what they were dealing with.

A mile and a half away, the Tuscaloosa, Ala., tornado was touching down.

When the worst was over, Fox, the golf course superintendent at Tuscaloosa’s Ol’ Colony Golf Complex, stepped outside.

“It was black as night and eerily calm,” he said. “Everybody says it sounds like a freight train. It sounds worse.

This thing sounded like a group of jets hitting the afterburners at the same time.”

The tornado reportedly carved a path 300 miles long from Mississippi to Georgia, traveling at about 180 miles per hour. “We were looking at it as it passed and I was saying, “This is bad,”” Fox said. “You could see it clear as day.”

About a half hour after the tornado struck, as Fox stood in his yard marveling at the eerie calm, the winds picked up again — a second, smaller twister. It swept right over the golf course. “I could see it. It was spinning up in the air and I could see it,” Fox marveled.

Like Fox’s home and neighborhood, the golf course was spared damage. Other areas, however, were not so lucky. The death toll reached 41 in Tuscaloosa alone; 30 residents are still missing; and entire neighborhoods are obliterated.

“It looks like you took bulldozers and lined them up in a row and went to work,” Fox said. “There’s nothing left.”

Golfdom Scores Big at 2011 TOCA Communication Contest

We stop here briefly to sing our own praises (don’t mind if we do). That’s because we earned accolades at the Turf and Ornamental Communicators Association (TOCA) contest, bringing home awards for editorial content and graphic design.

Golfdom earned six first place awards, including honors for feature writing (for the story “Giving Thanks”); web writing (“A Golf Course Uplifts a Community”); special projects (Plant Health Report and Water Wise); and headline writing (“I’ll Take a... Mulligan”). Golfdom also won first place for portrait photography with the June 2010 cover photo of Chris Dalhamer.

Seth Jones won merits for his work last year at Golf Course Management magazine, for his operations profile of Whistling Straits and for his cover story on Nick Price.

Congrats, team!
