Two new fungicides. One new active ingredient.

We’re about to reveal two brand new fungicides powered by Xemium®—both delivering continuous disease control in the most challenging conditions. One is the newest addition to the Intrinsic™ brand fungicide family and combines broad-spectrum control with advanced plant health. The other offers longer-lasting dollar spot protection—with both preventative and curative properties.

Don’t miss the unveiling of these two new fungicides—check out the big reveal at booth #1321 at the Golf Industry Show in Orlando.

With the US Women’s Open coming to Sebonack in 2013, Garret Bodington made the decision to go with John Deere. Why? “John Deere gave us tremendous support for the Women’s Open, from existing equipment to loaners. Also, the E-Cut™ Hybrid technology was a big selling point, since it eliminates hydraulic leak points in the reels. We use E-Cuts on every fairway and every green.” From E-Cut Hybrid technology to heavy-duty utility vehicles, Garret trusts his entire course to John Deere. To see the difference we can make on your course, call your John Deere Golf distributor today.

**Trusted by the best courses on Earth.**
Resolutions for a New Year

Five superintendents spill about their New Year’s resolutions. Will they keep them? Only time can tell.

BY MOLLY GASE
A NEW generation of Abamectin featuring the exclusive CapVantage™ technology. 
**ABBA® CS** is a controlled release insecticide that delivers an enhanced performance. **2DQ™**, a three-way herbicide with 2,4-D, Dicamba and Quinclorac to provide superior control of annual and perennial broadleaf weeds. By creating new and unique products to help keep Lawns, Landscapes, Nurseries, Greenhouses and other general maintenance areas looking their best. we’re making “Basic” even “Better”.

THE ROLLER REVOLUTION

The only dual drive A/C roller on the market, the new SMITHCO ELECTRA rolls 175,000 square feet* on a single charge. And that’s just for starters!

- **Double the run time** versus conventional D/C drive systems.
- **Eliminates hydraulic leaks** that ruin your greens.
- **Superior hill climbing** and traction.
- **Whisper-quiet** operation.
- Electric **fail-safe parking brakes**.

Smithco electric rollers have been used at the Ryder Cup Matches, PGA Championships and the U.S. Open to eliminate any chance for oil leaks on the greens as well as make the greens perfectly playable.

*over four acres

One small slip for a man

If you see Jim Becker at the Golf Industry Show, forgive him if he doesn’t shake hands. After all, his wrist has been shattered. If you don’t know Becker, it’s because he’s a behind-the-scenes guy. But there’s also a chance you’ve smiled and waved at him and didn’t even know it. For example, the hundred or so guys working at Merion during last year’s U.S. Open... the ponytailed fellow behind the video camera rolling tape as everyone rolled out on the golf course? That was Becker.

As President and CEO of Wisconsin-based Epic Creative, Becker does a lot of the video you see in our industry. The GCSAA TV videos are often his productions. Videography and photography are two of his many passions. Golf is another (he’s a great partner to have in a scramble format.)

Recently Becker’s life took a dramatic turn. “The thing most startling to me was, I didn’t even realize I was doing something dangerous,” Becker says, looking back. “It’s a miracle, as far as I’m concerned, that I didn’t break my neck.”

Becker and his new fiancée, Sandy Cashman, bought a house. It was while they were moving out of the old house that Becker took a bad fall. He was handing a wicker chair — not at all heavy, he adds — over a porch railing down to a mover below him.

He slipped and fell, face first, 15 feet on to a concrete driveway. Well, the mover and the wicker chair broke his fall somewhat. Becker, probably fortunately, doesn’t remember the details very well. “According to the mover, I never lost consciousness. The mover said I sat right back up,” Becker says. “What I do remember was there was a lot of blood in the snow.”

Becker broke his eye socket, shattered his wrist and needed 44 stitches in his head. And he considers himself every bit of lucky.

“The lesson I learned was that life can change dramatically real quick,” Becker says. “Only seconds before my biggest worry was that it had started snowing. A split second later I’m praying that I’m not going to be paralyzed.”

Becker has every intention of being at the GIS show this month in Orlando. There’s little doubt he’d miss it. After all, the GCSAA will have (free plug!) live coverage of the show this year, so his team at Epic will need him.

For now, he’s just thankful. Thankful to be in his new house with his soon-to-be new wife, thankful to have his full faculties, thankful to have so many “awesome friends” who helped finish up the move for him and Sandy.

Just last month I wrote here about my “best of” and “worst of” 2013. Jim’s fall is another reminder that my “worst of” wasn’t so bad. And then reading Mark’s column this month (page 20) about losing his father is another reminder.

My wife’s car made a loud hissing sound the other day. The resulting $800 repair put me in a bad mood for about a day. The next day I picked up my 7-year-old daughter and she told me about her bad day. It involved her 1st grade class getting scolded for being too loud in the hall.

I looked at my daughter and I told her, “Evey, we’re all healthy. Which means I’m happy.”
