New Standard
Issued For
Confined Space

The Occupational Safety and Health Administration has issued a new standard for confined space and permit-required confined space.

Confined spaces are areas with limited or restricted means of entry or exit, large enough to allow an employee to enter and perform work, and not designed for continuous occupancy.

Permit-required confined spaces contain or have the potential to contain a hazardous atmosphere; contain a material that has the potential for engulfing an entrant; have an internal configuration that might cause an entrant to be trapped or asphyxiated by inward walls or sloping, tapering floor; and contain any other recognized serious safety or health hazards.

OSHA has released a flow chart to help employers determine if their confined spaces require permits under the new standard.
