No More Bouncing Around: Service Center Answers Your Questions

Beginning July 31, when you call GCSAA you’ll receive an even higher level of customer service. GCSAA’s service center will be open to meet as many of your member needs as possible with one phone call.

Let’s say you want to change your address, check your membership status, subscribe to the Employment Referral Service (ERS) and get an information packet. No longer will you be bounced from the membership department to the career development department to information services. You’ll be able to gather all this information and sign up for these services with just one phone call to one service center representative.

GCSAA recognizes that your time is valuable, and the goal of the service center is to keep you on course, so you can get back to business.

Specializing in
Re-Design & Construction of Golf Courses

Early warning of thunderstorm activity in your area is essential when you need to make critical decisions regarding personnel safety and the isolation of sensitive equipment. The USGA, PGA, and over 500 individual golf courses rely on Global Atmospherics Inc., manufacturer of ESID.

Renowned organizations such as NASA, Seaworld, the National Weather Service, the U.S. Military, American Airlines, MCI and hundreds of customers in over 30 countries worldwide have chosen Global Atmospherics to meet their lightning warning, detection and information needs. This depth of experience is just one of the reasons that led TORO, the leading turf management organization in the world and QPS, manufacturer of the #1 golf course siren system, COURSE ALERT, to select Global Atmospherics to co-develop a product to meet the unique needs of their golfing customers, friends and associates.

That product is ESID

When you need...

- 100% Thunderstorm Detection Efficiency
- Complete Warning / System Shut-down Automation
- Zero False Alarms
- Highly Accurate Range Information
- Easy Installation
- Low Maintenance
- Patented State of the Art Technology

... and the confidence of teaming up with the World Leader in lightning detection and location.
