There Are 3 Very Good Reasons To Keep Your Trees Pruned: It’s a Health Treatment!

1. Dead wood is full of decay organisms and insects. Removal of this dead wood allows the tree to seal out decay infection, and takes stress off its defense system.

2. Thinning allows proper air circulation and prevents damaging loss of limbs during high winds. Air circulation also prevents fungal infections.

3. Pruning actually stimulates your tree, it speeds up many metabolic processes and creates a tree with greater health.

LEITNER COMPANY
Specializing in Soils for Golf Course Maintenance & Construction

Soil mixing and processing specialists.
Supplying the Golf Course Industry with soil and sand products for over 50 year.
From 10 yards to 10,000 yards — material to specification for topdressing and construction.
Quality — Reliability — Experience
