By the time you read this, your height-of-cut could have been adjusted.

NEW QUICK ADJUST REELS
Yes it’s now this easy to adjust the height-of-cut. Just click in a power drill on either side of the cutting unit, hit the trigger, watch the gauge, and you’re done. No wrenches, and no need to double-check both sides. (Thanks to SpeedLink technology, they match perfectly every time.) But don’t just read about these reels. Call your John Deere Golf distributor for a demo. Consider us part of your crew.
