The lus and Outs of Getting Certified: It's Well-Worth the Effort

CGCS

Contributed by Jim Pavonetti, Editor of Tee To Green Magazine and reprinted with permission from the GCSAA.

every turf professional knows, the Certified Golf Course Superintendent (CGCS) designation is the highest level of recognition a golf course superintendent can achieve. In the job market, it is a professional designation years of experience as a superintendent and that sets you apart from others, especially when pursuing a higher-level position. Once hired, it shows your employer that you are continually striving to enhance your skills and remain on the pulse of the industry as you pursue the continuing education needed to maintain your certification.

Though earning this status has always meant satisfying a series of criteria, in 2001, GCSAA made the requirements for becoming certified considerably more stringent. About 25 percent of GCSAA Class A members currently hold the CGCS status, but, admittedly, the numbers pursuing certification seem to have fallen off. The word on the street is that many superintendents are discouraged by what now appears to be an over- website. bearing and time-consuming amount of work.

Well, having recently gone through the new certification process, I can assure you that it's not all that bad-and actually well worth the effort. I feel that completing the process has made me a better manager and better superintendent, which in effect, has made me more valuable to my club.I learned more effective ways of managing my time and my staff. I discovered things that I could be doing better or that I should be doing but wasn't. And working through the program gave me the tools I've needed to enhance any completing areas of weakness and also capitalize on my this assessment. strengths.

What follows is a rundown on what it takes to become a certified golf course super- Here's where things get a little more chalintendent-as well as a roundup of Met member sentiments on what earning CGCS status has meant to them. I hope that after reading this article, you'll be inspired to carve out the time to pursue your certification-and join the ranks of the 79 Met members who are certified golf course superintendents today.

s just about First Things First: Becoming Eligible

Before you can begin the certification process, you have to be sure you meet the minimum requirements. These include level of education. Your educational level will dictate how many years of experience as a superintendent you will need and how many education points you will have to complete before moving forward with the certification process. The chart on page 4 specifies these requirements.

The eligibility requirements don't stop there. You also must:

Be currently employed as a golf course superintendent.

Possess a pesticide applicators license or country does not have a pesticide license. Complete the online Self-Assessment Tool. which can be found on the GCSAA's

Complete a certification portfolio.

About the Self-Assessment Tool

Working through the online self-assessment helps you identify how you measure up to the competencies needed to perform successfully as a superintendent-and on the exam. Under each competency, you'll find the education resources-seminars, books, or articles—available to help you strengthen any gaps you might uncover in your knowledge and abilities in all areas. Another bonus:You'll receive .5 CEUs for

About the Portfolio

lenging. The certification portfolio is a collection of 33 sections that have to be completed before you can submit your application for the program. These sections are divided into three parts: Work Samples, Skill Statements, and Case Studies. The portfolio was created to evaluate your understanding and application of the management and problem-solving skills needed

to run a successful golf course operation.

I know, right now you're thinking, "You have to be kidding me, right?" Admittedly, the portfolio is one of the biggest stumbling blocks in superintendents' motivation to become certified. I'm not going to say it's not a lot of work, but you can begin building a portfolio at any point in your career, even as an assistant, and if you're a superintendent, you're probably already doing what's required in some of the sections anyway. Take the Work Samples section. Here, you have to provide evidence of tools and documents that you use to manage staff. This might include employee reviews, employee training,job descriptions,or a meeting agenda ... things you have pretty readily available.

One thing that you should be sure to pass the GCSAA's IPM exam if your state or download from the GCSAA's website is the Portfolio Scoring Rubric. This is a great vehicle for helping you make sure that you do not leave any part of an answer out. It is what the judges use to grade your portfolio, so reviewing it can prove to be a great timesaver, particularly since any errors or omissions will require that your portfolio be returned to you for revision. Ugh.

> I have judged six portfolios in the past three years, and the most common reason any section is sent back for a redo-believe it or not-is because of grammar, punctuation, or spelling errors. I strongly suggest having someone else proofread your work before sending it in. It will save you a lot of time and aggravation.

Right now, you have two options in putting together your portfolio: You can create an electronic portfolio, or you can submit a paper-based version. Regardless of which method you choose, GCSAA provides helpful templates on its website that are designed to guide you in the creation of your portfolio while ensuring that you include all the necessary information.

If you choose the paper-based portfolio, you have to download the templates onto your computer, type in the answers, and print three copies of everything. Then you have to put them into separate binders and

GCSAA Point Requirements

Level of Education	Superintendent Ex	xperience	Total Points
Bachelor's degree in turf or plant science	3 y	years	3 (2 edu)*
Other bachelor's degree plus associate's deg plant science, or equivalent two-year turf ce (i.e., Michigan State, Penn State)	•	years	3 (2 edu)
Other bachelor's degree	4	years	5 (3 edu)
Associate's degree in turf/plant science, or a two-year turf certificate (i.e., Michigan Stat	-	years	5 (3 edu)
Turf certificate/short courses (400-hour mir (i.e., Rutgers, Penn State World Campus)	nimum) 5 y	years	10 (6 edu)
Other associate's degree	6 y	vears	10 (6 edu)
No degree or recognized certificate	7 ye	vears	40 (32 edu)

*Points in parentheses represent the minimum education points required to reach total points.

mail two of the copies to GCSAA, where they would then be sent to two different judges to be graded.

The new-and-improved electronic option allows you to enter your information directly into your e-portfolio by copying and pasting your information from the templates or from something you might have already saved on your computer. Your portfolio will be accessible for five years from the last time you opened it. Another plus with this method is that you will receive your results from the judges more quickly because there is no time wasted waiting for items to be mailed back and forth.

Completing the Certification Eligibility Worksheet

You'll complete this worksheet, which you can find on the GCSAA website, to establish and document your eligibility requirements. Once you've met the requirements, GCSAA will send you a certification application form to complete and submit with an application fee and your portfolio.

The Application

When your eligibility is approved and you have your portfolio ready to go, you can submit your application. Once the applica-

tion is received, you will have one year to complete the remainder of the certification process, which includes the written exam, the attesting of your golf facility, and the evaluation of your portfolio. The exam and attesting can be completed in any order within the one-year period.

This means planning ahead is essential. You have to keep in mind that:

The attesting of your course must be conducted during the growing season.

• A 60-day waiting period is required between exam retakes. So if for some reason you have to retake a section of the exam (you're allowed two retakes), you have to be sure there's ample time remaining in your one-year applicant period for completion. It really pays to wait until you're well prepared to take the exam before submitting your application.

If any additional information or materials are needed for your portfolio, it must be returned for reevaluation during your applicant period.

I, personally, submitted my application in the early fall, which gave me the off-season to pass the exam and the whole summer to get my attesting done.

The Exam

The exam is a closed-book, multiple-choice test consisting of three parts with a total of 211 questions. You must pass each section of the exam with at least a 67 percent.

The Self-Assessment Tool mentioned earlier will identify for you the materials or seminars that will help you pass this exam, so it's important that you be honest with yourTo do today: Register for 1/2 day GCSAA Seminar Participate in GCSAA Webinar Prepare for CGCS accreditation testing Schedule GIS Show

self when you work through this online assessment.

On the test, there are some things that you're expected to know from memory, such as the volume of a cube, converting cubic feet to cubic yards, calculating the percent slope, USGA specifications for greens, the GCSAA's Code of Ethics, general knowledge about turf species from all geographical areas, and how to figure depreciation. You are also expected to have some general knowledge about the Audubon Sanctuary Program for Golf Courses. Formulas for other, more difficult math problems are provided.

As I noted earlier, you have one year to pass the exam, but there is a 60-day waiting period between retakes, so plan ahead!

The Attesting

Fufilling the attesting requirement may be the easiest part of the program for some and the most nerve-racking for others. This is when your local chapter assigns two certified superintendents to come and evaluate your golf course operation. This evaluation is conducted during your course's growing season and covers four major areas: course conditions (based on your budget), maintenance facility, recordkeeping methods, and communication skills.

You can prepare for this visit by downloading the grading form that the attestors will use to evaluate your course. There is also the"Attestor Guidelines"booklet available as a PDF, and an "Attestor Training Video," which also covers everything the attestors will be looking for.

Maintaining CGCS Status

.

Once you become certified, you must maintain your CGCS status by obtaining 15 points every five years. (At least five of the points have to be education points; the remainder can be service points.) If 15 points pmitchell@gcsaa.org or at 800-472-7878. are too much, you can retake the exam and obtain only 5 points. (At least two have to be education points, in this case.)

Maintaining CGCS Status When Retired

What about the people who have been certified but are now on to other things like sales or retirement? You may be eligible to maintain a "CGCS Retired" status, which means you no longer have to renew with CEUs. You simply have to meet the requirements for a retired membership classification in GCSAA, such as Class AA (Life Member), and you have to have maintained your certified status up to the point of retirement.

To be eligible for Class AA (Life Membership), one has to have retired as a golf course superintendent and been an assistant superintendent or golf course superintendent member of the GCSAA for 25 years, of which a minimum of 20 years has been spent as a golf course superintendent.

For Questions About the Certification Process

If you have any questions or concerns about the program, a great resource is Penny Mitchell, the program's Senior Manager of Certification. She can be reached at Good luck!

Jim Pavonetti, editor of Tee to Green, is superintendent at Fairview Country Club in Greenwich, CT. Jim has served on the GCSAA's Certification Committee for the past three years and also serves as a Portfolio judge.
