after a reasonably good shot that just misses the green.

(3) An area two to three feet in radius around the hole should be as nearly level as possible and of uniform grade. In no case should holes be located in tricky places, or on sharp slopes where a ball can gather speed. A player above the hole should be able to stop the ball at the hole.

(4) Consider the condition of nearby turf, especially taking care to avoid old hole plugs which have not completely healed.

(5) Holes should be cut as nearly on the vertical as possible, not plumb with the contour of the green.

(6) There should be a balanced selection of hole locations for the entire course with respect to left, right, central, front and back positions. For example, avoid too many left positions with resulting premium on drawn or hooked shots.

(7) For a competition played over several days, the course should be kept in balance daily as to degree of difficulty. In a stroke competition, the first hole of the first round is as important as the last hole of the last round, and so the course should not be set up appreciably more difficult for any round — balanced treatment is the aim. An old concept of making the course progressively harder round after round is fallacious. One form of balanced daily treatment is to select six quite difficult hole locations, six which are moderately difficult, and six which are relatively easy.

(8) During practice days before a competition, locate holes in areas not to be used during the competition and which will not result in areas to be used being impaired by foot traffic.

(9) Anticipate the players’ traffic patterns. Locate holes for early rounds so that good hole locations for later rounds will not be spoiled by players leaving the green.

(10) In match play, a hole location may, if necessary, be changed during a round provided the players in each match play with the hole in the same location.

In stroke play, rule 33-2b requires that all competitors in a single round play with each hole cut in the same position, but see Exception to that Rule.

When 36 holes are played in one day, it is not customary for hole locations to be changed between rounds, but there is no Rule to prohibit changing them. If they are changed, all players should be informed.

(11) The greenkeeper who cuts the holes should make sure that the Rules of Golf are observed, especially the requirements that the hole-liner not exceed 4¾ inches in outer diameter and that it be sunk at least one inch below the putting green surface.

SECOND TURF TOURNEY
BIG SUCCESS

The Second Annual Turfgrass Research Benefit Day, on Friday, June 17, was a big success. Held on 20 prestigious Twin City courses, the Minnesota Turf Tourney had over 160 players this year. The weather was great, and all the courses were in fine shape. Golden Valley Country Club was the site of this year's wrap-up dinner. At the conclusion of the rounds at each of the courses, all the competitors descended on Golden Valley to talk about their day and receive the awards over a wonderful steak dinner.

Our special thanks to the 20 participating clubs who donated tee times and carts for this benefit. The 20 clubs were:

Edina CC
Dellwood Hills GC
Golden Valley CC
Hazeltine National GC
Hillcrest CC
Interlachen CC
Indian Hills GC
Midland Hills CC
Minikahda Club
Minneapolis GC
Minnesota Valley CC
North Oaks GC
Oak Ridge CC
Rolling Green CC
Southview CC
Stillwater CC
Town & Country Club
Wayzata CC
Wedgewood Valley GC
White Bear YC

The results of the event are as follows:

1st  26 Under
     Bob Weikle
     Gary Weikle
     Les Froyson
     Paul Haugen

2nd tie 25 Under
        Tom Bergren
        Ken Dehken
        Paul Barton
        Dave Swanson

2nd tie 25 Under
        Marc Cabot
        Gary Dunham
        Terry Cox
        Del Sand

4th tie 21 Under
        Michael Klatte
        Alex Schraut
        Doug Smith
        Bill Skrie

21 Under
        Fred Anderson
        Keith Scott
        Chuck Johnson
        Mike Redmond

21 Under
        Jeff Stewart
        Richard Nickel
        Mark Howard
        John Pierson

To Keep Your Course In Classic Condition, Use These High-Quality Products from NOR-AM

• NITROFORM SLOW-RELEASE NITROGEN
Releases by slow bacterial action to provide consistent 18% nitrogen.
• TURCAM INSECTICIDE
Controls a wide range of turf and ornamental pests.
• PROGRASS HERBICIDE
Controls certain annual grasses and broadleaf weeds in ornamental turf.
• DELTCI INSECTICIDE
Gives fast knockdown and long-term control of fleas, ticks and other pests.
• BANOL TURF AND ORNAMENTAL FUNGICIDE
Controls pythium and phytophthora.
• PROXOL 80SP INSECTICIDE
Controls white grubs, sod webworms, cutworms and armyworms in fine turf.

TORO GREENS AERATOR
Built for speed. Designed to Last.

Up to 13,000 square feet per hour.

**Better, more uniform penetration.** You get a deeper, more effective coring depth. Consistently good cores and clean holes mean effective aeration.

1. **Fingertip convenience**
   Ignition, throttle, choke, brake and clutch controls are within easy reach.

2. **Quick tine change.**
   All you need is an ordinary socket wrench and five minutes to change the tines on a Toro Greens Aerator.

3. **Windrower diverts debris into rows for easy removal.**

4. **Electronic ignition** for fast, dependable starting (no pulling or tugging of ropes).

5. **Hydraulic lift lever** for the coring unit.

6. **Greater power.**

7. **Quick tine change.**
