**Fee-Related Notifications to USCIS**

A petitioner, agent, facilitator, recruiter, or similar employment service is prohibited from collecting a job placement fee or other compensation (either direct or indirect) at any time from an alien H-2B worker as a condition of employment. Petitioners may avoid denial or revocation of their H-2B petitions if they notify USCIS that they obtained information concerning the beneficiary’s payment (or agreement to pay) a prohibited fee or compensation to any agent, facilitator, recruiter, or similar employment service only after they filed their H-2B petition. This narrow exception does not apply, however, where a petitioner knew or should have known at the time of the filing of its H-2B petition that the prospective worker had paid (or agreed to pay) such recruitment-related fees to any such persons or entities. Petitioners must notify USCIS of an H-2A worker’s payment or agreement to pay prohibited fees to a recruiter, facilitator, or similar employment service within 2 workdays of gaining knowledge of such payment or agreement.

**Petitioners must include the following information in the fee-related notification:**

1. The reason for the notification;
2. The USCIS receipt number of the approved H-2B petition;
3. The petitioner’s information
   - Name:
   - Address
   - Phone number
4. The employer’s information (if different from that of the petitioner):
   - Name
   - Address
   - Phone number
5. Information about the recruiter, facilitator, or placement service to which the beneficiaries paid or agreed to pay the prohibited fees:
   - Name
   - Address

**Fees not prohibited are:**

- The lesser of the fair market value or actual costs of transportation; and
- Any government-mandated passport, visa, or inspection fees to the extent that the payment of such costs and fees by the H-2B worker is not prohibited by statute or other laws. This includes, but is not limited to, the FLSA, DOL regulations, case law, and DOL interpretations of the FLSA and other relevant labor laws.

Fall Shoot Out
Minnesota Horse and Hunt Club
On Halloween of 2013, graduate student Glen Obear dressed up as a very busy guy and stood up in front of a fairly large audience to defend his Master’s research in Soil Science. A few weeks later, he did the same thing for his Entomology degree under Dr. Chris Williamson. Many of you know Glen from his three years here as a graduate student in the UW-Madison turf program. Glen has given several talks at the UW Field Day and other educational events. He’s also visited many golf courses around the state of Wisconsin to collect soil samples or evaluate on-course research trials.

Glen’s work in Soils covered a wide range of topics revolving around the central theme of soil chemical problems in sand root zones. I won’t attempt to summarize all of his findings, but will report on a few bits and pieces that I find very interesting.

The first time I met Glen, he was standing by my office door with a chunk of iron-cemented pea gravel from the bottom of a USGA green that he brought back from his internship in Hawaii. He wanted to know exactly what it was, how it formed, and how to get rid of it. He found answers from me and other professors unsatisfying, so I told him he might get the chance to research it himself as a graduate student. About two years later, that’s exactly what he did. His graduate studies were largely funded by the USGA and Wayne R. Kussow Wisconsin Distinguished Graduate Fellowship endowed by the Wisconsin Turfgrass Association.

At first, we figured this iron cementation was a rare problem that was specific to the tropics because the only other case that we knew of was from a club in Vietnam. However, after randomly sampling greens from all over the US, Glen estimates that 25% of all USGA greens will show...
