THE 1961 MID-ATLANTIC TURFGRASS CONFERENCE held in Baltimore on January 9-10 was the most successful ever held. Attendance was good - 182 registered - the speakers did a very good job and we made a little profit to apply toward the 1962 Conference.

Cooperation and coordination has to be perfect for an affair of this kind to succeed and this one did, so we are indebted to many people. First of course is Dr. George Langford who, as Conference Director, did the planning that made everything work. He was assisted by a Program Committee consisting of Chairman Tom Doerer, Frank Dunlap, Fred Gran, George Gumm, Charles Hallowell, Bob Shields and Buck Whetsell.

Second is the impressive list of speakers who so generously gave their time, thought and effort. On hand was Bill Clark, President of the Mid-Atlantic PGA; Jim Thomas, President of the GCSAA; Mr. William Chapin, Chairman of the USGA Green Section; Dr. William Daniel, Purdue University; and Dr. H.B. Couch of Penn State.

Also contributing to the success of the meeting was Merrell Whittlesey, President of the Golf Writers of America and Golf Editor of the WASHINGTON EVENING STAR. Two well known local favorites - Dr. Felix Juska and Dr. Fred V. Gran help considerably - as did newcomers to the program, Dr. Paul Santelmann, Dr. Richard Schmidt and Wade Stith.

From the ranks of Superintendents came Hurley Savage, Harry McSloy, Tom Doerer, Frank Tull, Bob Shields, Wayne Jerome and Frank Dunlap.

Special thanks go to Mal McLaren, Past President of the National Association and Superintendents at Oakwood Country Club, Mal would not accept so much as expense money for his trip down from Cleveland. He said he did it as a tribute and to show his respect for an old friend in the Mid-Atlantic area - outgoing President Frank Dunlap. How’s that for comradeship among Superintendents?

The Chapter extends thanks and appreciation to all speakers and participants and to those who made the Social Hour so gay and pleasant. They are: Wilson Disney of the F.W. Bolgianp Company; Jack Witcher, Gustin’s Baltimore Toro; Bob Adams, National Capital Toro; and George Cornell of the G.L. Cornell Company.

THE USGA MEETING. The Educational Program of the USGA Green Section Meeting in New York on January 27 was one of the best meetings we have attended. The subject was - "The Golf Course Worker - Training and Direction." The talk given by Tom Leonard, Superintendent, Oaks River Country Club Houston, Texas, is briefly outlines below.

Superintendents should have year plan, monthly plan, weekly plan and daily plan. Year plan is worked out with the Greens Committee. Monthly plan should be worked up around the Club’s Golf activities so as not to interfere with golf tournament schedule. The weekly plan could include all work planned for the week.
Leonard's daily plan is explained in this manner:
1. Go over the day's work with the assistant, explaining what is to be done, by whom, with what equipment and how it is to be accomplished.
2. Plan program in a way that least interferes with play.
3. Wherever possible plan to complete big operations as soon as possible so they won't interfere with plans for following day. Don't get too many irons in the fire.
4. Listen to the weather man and have alternate program should bad weather come. This is a good time for employee meetings.
5. Place each employee where he is most beneficial, keeping in mind his abilities, attitude and desires.
6. Keep trained man on same job but also have understudy or some one who can replace that man should he be absent.
7. Always have work available. Men don't like to be idle.
9. Keep employees informed. Give them as much information as possible. The more they know about the operation of a golf course the easier your job will be. Familiarize each man with each machine. Encourage men to report leaks, breaks, greens damage, disease or missing equipment. When each man knows what is going on and why he is in a better position to answer intelligently any question asked by members, resulting in a better employee with higher morale. Members will appreciate this extra courtesy.
10. Safety. Talk, act and live safety, constantly encouraging employees to work safely. Caution them on hidden dangers they might or might not be aware of. To do so shows them that you are concerned with him as a person. Encourage him also to want to work safely and to look out for the man working with him. Accident prevention is better than compensation.

Another thought from the USGA Meeting (this one contributed by Eddie Ault) "If the student hasn't learned, the teacher hasn't taught." Keep that in mind when you are breaking in a new man on the greensmower this coming spring.

U.S.G.A. TURFGRASS AWARD. The first annual award "For Outstanding Contribution to Golf Through Turfgrass Work" was presented to Dr. John Montieth at the New York Meeting. Dr. Montieth is well known in this area through his work as Director of the olf Arlington Turf Farm which was located where the Pentagon Building is now. Later he was Director of the USGA Green Section at Beltsville and many Mid-Atlantic members came in contact with him there. He was presented a small plaque which is a replica of the large plaque to be hung in Golf House with new names added each year. He was cited for his work in developing the first chemical control for dollar spot and brown patch, for developing Congressional, Arlington, Toronto and Cohansey bent grasses for putting greens and for testing two of the Zoysia grasses at the Beltsville Station.

THE NATIONAL MEETING. Nineteen Mid-Atlantic members attended the National Turfgrass Conference in Toronto the first week in February. There were 1,608 registrations.

We can all be justifiably proud of the presiding job done by President Jimmy Thomas, both at the Membership Meetings and as Master of Ceremonies at the banquet. He proved beyond a doubt that the saying "Once a Texan, always a Texan" is true by standing when the band played "Deep in the Heart of Texas."
