testing nearly every type of golf shot we concluded that the best turf from which to hit a controlled golf shot was close-cut, inwatered fescue turf. Irrigated bent-forget it!

I believe that, practically, we must work toward developing more drought-tolerant grasses and learn to manage them with minimum water. Dry grass is healthy grass. We must learn how to maintain healthy grass without the need for massive doses of lethal chemicals. Do we need to kill all the weeds? Let's let some wildflowers survive! Let's not spray pesticides fence to fence.
