We can't do anything about Teddy Temper. But when week, insects and disease show up on your turf, we have something for almost everyone of them. Chipco Turf Kleen, Chipco Turf Herbicide MCPP, SUP-R-FLO Maneb Flowable, Chipco Microgreen Liquefied, Chip-Cal Granular and Chipco Spot Kleen.

Everything to help keep your greens (and fairways) in the pink. From Rhodia Chipco Products.

"He's not just another duffer. He's chairman of the greens committee".

1. Systemics do not control all diseases, in fact are quite selective.
2. They control dollar spot very well and do a good job on stripe smut and Fusarium blight.
3. They are not effective against Pythium and Helminthosporium and quite a number of others. Brown Patch is questionable.
4. Fungal organisms can develop a resistance to the systemics, so should not be used continually as a contact spray as repeated applications.
5. The most efficient use of the systemics is when they are applied as drenches and the chemical is taken up gradually through the roots. HOW? Apply and water in at once with ½ to one inch of water.
6. Systemics should be used very infrequently and just ahead of expected outbreaks or just after the disease has been noted.
7. A soil drench in early to mid-June and in late August or September alternated with use of contact spray material between should be a reasonable type program.
8. Use of LSR for early leaf spot should suffice for May. Daconil or equal should take care of early dollar spot if it shows up. You have the ball!
