The President's Message

Last month's article in this newsletter by Virgil Robinson struck home with me, and I'm sure many other readers agree. Our experiences as golf course superintendents result in a series of highs and lows. For the most part, I think we would all agree that there isn't a more gratifying yet humbling profession. We have all had bad years. If you haven't had yours, it's just a matter of time. The demands of our profession are very taxing on our leisure time, often at the expense of time shared with our families.

Time away from the course is something that we owe ourselves, our families, and, yes, our employers. By being married to the course, a superintendent can become complacent or stale. You can easily begin overlooking details or symptoms you should be seeing. A mental break from the day-to-day operation at the club can give you a fresh outlook, help you to keep matters in perspective, and sharpen your senses.

Our July meeting will be at Winters Run Golf Club and our host is John Drew. This will be our first ever luncheon meeting, with golf following. Please note the details of the July 9 program on this page, and don't neglect to register in advance by calling our office at 964-0070.

Michael J. Larsen, President

Some Insight Into New Zealand Courses

At our June Meeting at Montgomery Country Club, Paul Standerfer of Toro Turf Equipment ably filled in for a speaker forced to cancel at the last moment; he talked about golf course maintenance in New Zealand, based on his own experience in that faroff part of the world.

Himself a former superintendent in California, Paul said that after three years he left that business because of the stress level he encountered, and that circumstances made the relaxed attitude he found among superintendents very intriguing. The New Zealand Turf Culture Institute, their equivalent of the USGA Green Section, arranged for him to tour courses on the North Island, starting in Auckland. He found two islands that make up the country to have the largest ratio of golf courses to people in the world, some 300 to 3 million.

Among the other things that Standerfer learned was that most greenskeepers in New Zealand have gotten their impressions of U.S. golf course maintenance from the superintendents' magazine and the USGA Record; as a result, he had to spend a lot of time debunking ideas of what it is we do. Generally speaking, their procedures are much simpler and cheaper than ours. Some courses use grazing sheep to keep their fairways mowed, relying on low-charge electric fences to keep the animals off.

NEWSLETTER

VOLUME XXXVIII JULY 1985 NUMBER 5

We Meet July 9 At Winters Run

An unusual luncheon meeting will precede golf at the MAAGCS July 9 gathering at Winters Run Golf Club near Bel Air, Md., where John Drew holds forth as superintendent. His schedule for that day includes an informal outdoor lunch after 11:30 a.m., the business meeting at 1 p.m., followed by the match play quarterfinals and open golf.

Winters Run Golf Club was opened in 1972, having been designed by Raymond F. "Buddy" Loving, well-known golf course architect from Charlotteville, Va. It is a fairly open course laid out on gently rolling land and features water hazards on 8 of its 18 holes. Its greens are Penncross bent and its fairways are a bluegrass, perennial rye mixture.

John Drew has been superintendent at Winters Run since the course was under construction; indeed, he describes his tenure as having lasted "forever." It is his first and only golf course affiliation. His mowing schedule is five times a week for the greens, to 5 mm., three times a week for fairways, to 3 1/4", and about once a week for the rough, 2 3/8".

Directions to Winter Run, which is north of Baltimore, are as follows: Drive north on I-95 from Baltimore (members coming from Washington should use the Harbor Tunnel), take the Md. Rt. 152 exit, turning left (north) onto 152 to Fallston. Several miles later, turn right at the next stop light onto U.S. Rt. 1. Follow it to Bel Air, turning left at the traffic light at Harford Mall onto Toll Gate Road. The club is 1.3 miles on the left. There used to be a sign, John says, but it fell down two years ago and he hasn't had time to put it back up. The red barn is a good landmark.

The program is as follows:

11:30 a.m. — Beer is tapped
12 noon — Lunch (cost $10, including beer, etc.)
1 p.m. — Meeting, followed by golf

Let John know you're coming; call 301-964-0070 for reservations.
1985 Officers and Directors
President .................. Mike Larsen
Vice President .......... Gerald Gerard
Secretary ........ George Renault

Finance Chairman ..... Nick Vance

From The Golf World

They played the first tournament ever scheduled at the new TPC at Avenel in mid-June; that's the PGA Tour course in Potomac, Md., where the Kemper Open will be played, starting in 1987. It was held for a select group of invitees from the 40 corporations that have purchased memberships in the club, plus some press people and other guests. The fairways are still rough graded dirt at present, and the cups were 1-foot-wide plastic buckets; players were limited to five clubs, and the format was a scramble. It won't be long before they start sproging the zoysia in the fairways, and the results of that effort will be of great interest to many clubs and their superintendents in the Mid-Atlantic area. Zoysia is a popular grass for fairways in the mid-West now, but other than some stripping and plugging in landing zones, it hasn't been tried locally before.

Something else being tried locally is American Golf, the new, non-traditional game. Two public courses, Goose Creek and Prince William have made it available on an optional basis. Each green has both a 6” cup and a regulation cup, and you can putt to either one. American Golf, which franchises its rules to courses willing to pay, allows 18 clubs instead of 14, sanctions mulligans, goes easy on the penalties, and pretty thoroughly perverts the game. Most true golfers either oppose such ventures violently or else just wish they could call it anything but "golf," which it isn't.

The Middle Atlantic PGA is collecting (and cutting down to size) used golf clubs to be given to youngsters who want to learn the game, as part of the National PGA's " Clubs for Kids" program. Clinics by PGA members will be held at nine sites on July 1 from noon to 4 p.m., and the clubs will be distributed to juniors who show up for the free lessons, plus refreshments from United Van Lines, which is sponsoring the local program. The nine sites for clinics (and club collection) are Hog Neck Golf Course in Easton, Hogan's Range in Upper Marlboro, Druid Hill Park in Baltimore, Shannon Green in Frederick, Woody's Range in Herndon, Langston in D.C., Lehr's Range in Richmond, Peninsula Range in Tidewater, and Drive-a-Way Range in Roanoke.

Something that could have been better publicized was Lesco's series of educational seminars given this spring. One was held at College Park, where a large group of golfers attended seminars held in 13 states in conjunction with Stauffer Chemical, Monsanto, and 3M.

NEW ZEALAND
(Continued from page 1)

the greens. The pH is low (3.5), there is less microbial activity in the soil, less poa annua, lots of thatch, no insects, and little use of chemicals.

Two courses on the North Island are fully irrigated; 25 more have water available for greens and tees; the rest rely on nature, which because of the geography, can usually do the job.

Paul believes that the courses he saw could not afford mechanization at anything like U.S. levels. The Wellington Golf Club, regarded as the finest, collects fees from its members at the rate of $600 per year. His advice to the New Zealanders was not to push for the adoption of expensive U.S. methods. He spoke very highly of the golf course maintenance he met, naming Ray Wendt as one who had devised very effective electric drive equipment because of his lack of trust for hydraulic drives. Finally, he noted, although chemicals are not widely used, there are no regulations on chemicals and their use, and almost any compound can be openly bought and used.

LETTERS . . .

May 8, 1985

Dear MAAGCS Members:

It is with gratitude that I write to thank you for the honor you bestowed upon me several weeks ago. Making me a Life Member of your organization was indeed a surprise and an honor for which I am very grateful. While living in the D.C. area, being a member of the Mid-Atlantic was one of my greatest pleasures. You are a great bunch of fellows, and I enjoyed my years of association with you. The friendship and closeness I had with some of you is indeed a treasure, and again I thank you.

At the present, I'm not feeling too good, but I'm doing my best to lick the big "C." There's always hope. God bless you all.

Sincerely,
Wayne B. Jerome

(Ed. Note: Wayne Jerome succumbed to his cancer at his home in Naples, Florida, in June.)

NEW MEMBERS

Jack Montecalvo, Class F, Sales Representative, Harford Industrial Minerals, Joppa, Md.
Kevin Driscoll, Class F, Loft's, Inc., Beltsville, Md.
Errico G. Pacilio, Class F, General Manager, Loft's, Inc., Beltsville, Md.
Lewis A. Lamp, Jr., Class F (Non-Resident), Consultant, Winchester, Va.

Golf in the Later Years

My muscles are flabby;
I can't hit a drive.
My mind often doubts if
I'm really alive.
My chipping is lousy,
I never could putt.
I guess I'll just stay home and
just sit on my butt.
My iron play's awful,
my woods are as bad.
I'm describing my game as a
shade sort of sad.
So the outlook for today is for
grief and for sorrow.
Say! who can we get for a
fourth tomorrow?
