

## Results of Height-of-Cut Survey During 1998 Michigan Turfgrass Field Day

David Gilstrap  
Department of Crop and Soil Sciences

On August 19, 1998, during last year's Michigan Turfgrass Field Day, Sports and Commercial Turf Tour participants were asked the following:

"In your opinion is the mowing height of each plot too short, too tall, or OK for a Kentucky bluegrass lawn?"

The actual mowing heights and the number of replications (3) were not revealed. The written responses, 251, indicated an overall preference for the 3 and 3.5 inch cutting heights (Fig. 1).
