When QUALITY Counts Most

It is during the longest, hardest days of the year, when the players as well as the grass are trying to make up for lost time, that PENNSYLVANIA Quality more than justifies itself to the busy Greenkeeper. It is then, for instance, that the sturdy Super Fairway Quint shows best, not only its speed and efficiency, but its ability to stand the "gaff" and stay on the job. Because every moving part of the Super Fairway Quint is roller-bearing (even the ground rollers)—all its knives are of the finest crucible tool steel, oil hardened and water tempered, and its lubrication throughout is Alemite. It is a stranger to the repair shop.

You will be interested in our attractive golf catalog containing full details on the Super Fairway, the Improved Super Roller Greens Mower and all the other PENNSYLVANIA Mowers for Golf Courses. Write today for your copy.

PENNSYLVANIA LAWN MOWER WORKS

TEN SUPER FAIRWAY FACTS
1. A unique, positive lifting device, easily operated by one man, permits the raising of the two outboard units so that it may enter narrow spaces.
2. Will cut all the fairways on any average 18-hole course in less than two days.
3. Ingenious swivel attachment permits each mower to follow exactly the contour of the ground it covers.
4. Frame supported on two separate ground wheels.
5. All bearings and gears in dirt-proof, oil-retaining housings.
7. Removing two bolts changes the Quint to a Trio ...
8. May be used to cut the rough by raising its units.
9. Each mower may be raised separately. Automatic clutch idles or engages cutting cylinders as they are raised or lowered.
10. Mower units interchangeable—will fit in any position.

The Super Roller Greens Mower has been still further improved for 1927.

From the Local Viewpoint

the course. This round table discussion proved of extreme interest, and much information as to the proper preparation of the soil and protection of the trunks was gained, as well as important tips on just when it is safe to lift trees for transplanting. Mr. Scherer expressed the belief that Spring is the best time of year for transplanting, but that no tree should be lifted if the buds have opened.

At the conclusion of the meeting an inspection of the course followed, and particular interest was shown in the re-bunkering of Number 9 green, then in process. The good effects of the drainage system installed at Oakwood Club by Wendell P. Miller of Columbus, Ohio, two years ago, were easily apparent. The growth of turf on the fairways testify to the value of tile drainage.

Mr. Bain, during the inspection of the course, advised the group that he has never been troubled with turf killing, either from the ordinary forms of brown-patch, or any other cause, and attributed this freedom from trouble to the consistent use of bi-chloride of mercury which he uses Spring and Fall for the eradication of earthworms.
