Our watering system includes fairways but even with it running twenty-four hours a day we were unable to keep up with the drought as well as I would have liked. However, I have been able to pull the stuff through well enough so that plans are now to open the course, May 30, 1930.

On the old course I used arsenate of lead at the rate of three pounds to one thousand square feet of putting green area. We mixed this in with the first topdressing. This put the worms out of the fight for the summer but had no effect on the chickweed or at least none that I could notice. We made two applications, another about September 1, as soon as worm casts began to show up again and had no more trouble. In the past crab grass has been quite a menace here but we started early and stayed late with our weeding, and had it pretty well subdued all season.

Most of the greens had a heavy attack of snow mold early in the spring. The only noticeable effect was a little slow starting of the bent but no damage. We were also visited with about three attacks of large brown patch that dissolved the greens but they soon recovered without any outside help.

I have been interested in the articles by greenkeepers about their experiences in your magazine. One thing that I regret is that we have no local organization here nearer than the Chicago association which is a little far to attend. Someone up in this part of the country ought to get busy, perhaps the time will be soon. I enjoyed the Show at Buffalo very much last year and hope to get to Louisville this February.

How To Kill Plantain

By G. F. JACOB, Greenkeeper

Stanton Heights Golf Club, Pittsburgh, Penna.

IN ANSWERING Mr. John Morley's questions I will say I had very little brown patch this year and treated it with Semesan successfully. I had no other diseases to bother with.

Worms I had plenty and I get them with Mowrah Meal. I had more weeds in my fairways than ever before, especially plantain and I would be very thankful to find out the best way to get rid of it.

Nu-Green Cures Brown Patch

By OTTO SCHAEEL, Greenkeeper

Wausau Country Club, Schofield, Wis.

WE HAD considerable brown patch but treated it immediately with Nu-Green which gave favorable results. We had considerable trouble with crab grass in our greens but pulled it all out by hand.

We put in a new eighteen hole putting green with Flossmoor stolons and it is coming along in good shape. We also enlarged several of our tees.

About Cocoos Bent

By M. D. LAMOREAUX, Greenkeeper

Kirtland Country Club, Willoughby, Ohio

Due to the fact that we have received so many requests for information as to what beneficial results we have achieved from introducing Cocoos seed into our Washington bent greens, I want to take this opportunity to pass this information on to fellow members of the N. A. G. A.

For the information of those who have had no experience with Cocoos, it is the finest growing strain of
