get his theoretical four. Diagonal traps for the carry are apt to catch one's tee shot unless it has a long and high carry. The second shot must also be of the same type and unusually straight if the green is to be gained. Traps and trees on the left, with an abundance of natural hazards provide plenty of trouble.

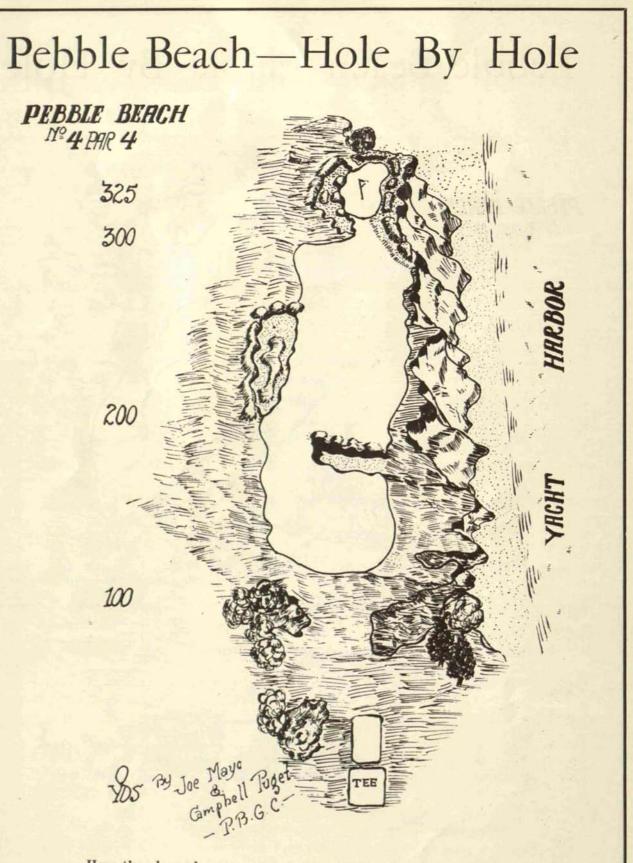

PAGE NINE

A great natural carry of 235 yards over series of diagonal sandy barrancas. The more to the right one plays, the more difficult becomes the second shot, as the trapping to right of green is dangerous. A perfectly played tee shot here leaves a comparatively easy second shot to the green. PAGE TEN

Here the player becomes acquainted with the Pacific Ocean. A 200 yard carry over barrancas, with an alternate route to the left. Second shot is only a short pitch but to a proportionately small green. Here it is easy to push a tee shot over cliffs to the beach on the right, or if a player hooks to bad lands on left his second shot becomes a most dangerous one.

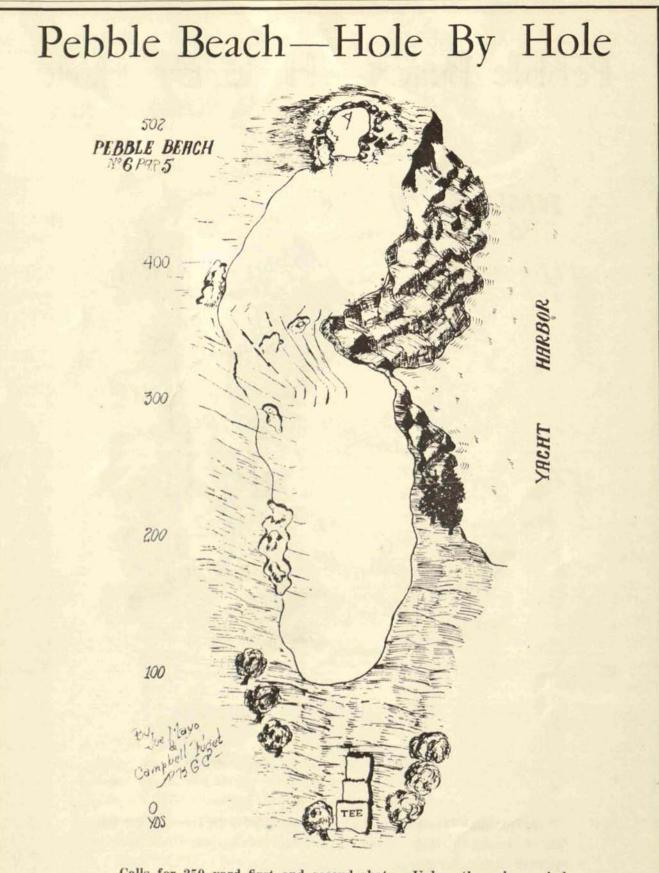

PAGE ELEVEN

A fearsome one-shotter. Large canyon filled with trees on the left. Out of bounds on right. Usually a stiff four-iron or sometimes more to a closely guarded green. PAGE TWELVE

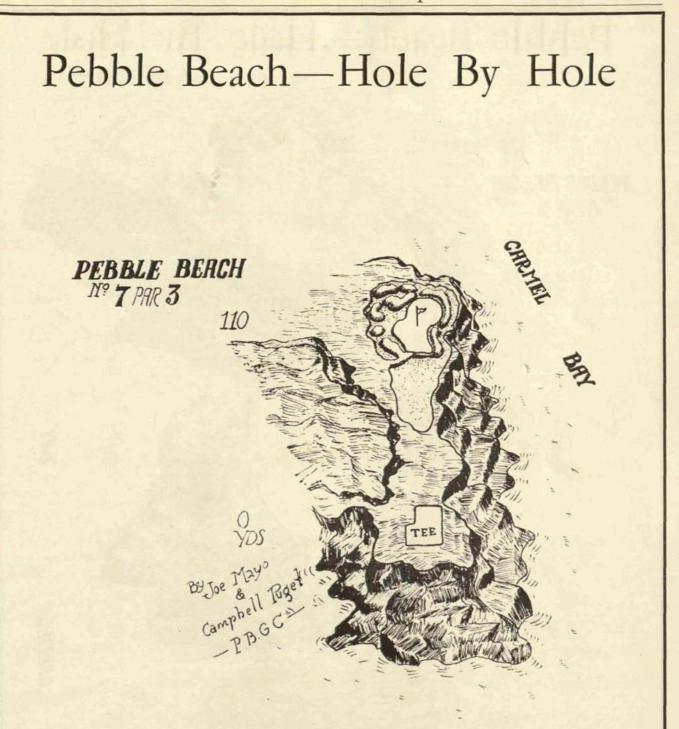

The National Greenkeeper

OCTOBER, 1929

Calls for 250 yard first and second shots. Unless there is a wind against one, one can just reach the green in two. Here the ocean comes into play as a hazard in an imposing way as trouble on fairway to left forces the line of play close to the high cliffs. The second shot is over an ocean bay and must have a high trajectory to clear the hill. A stiff par 5.

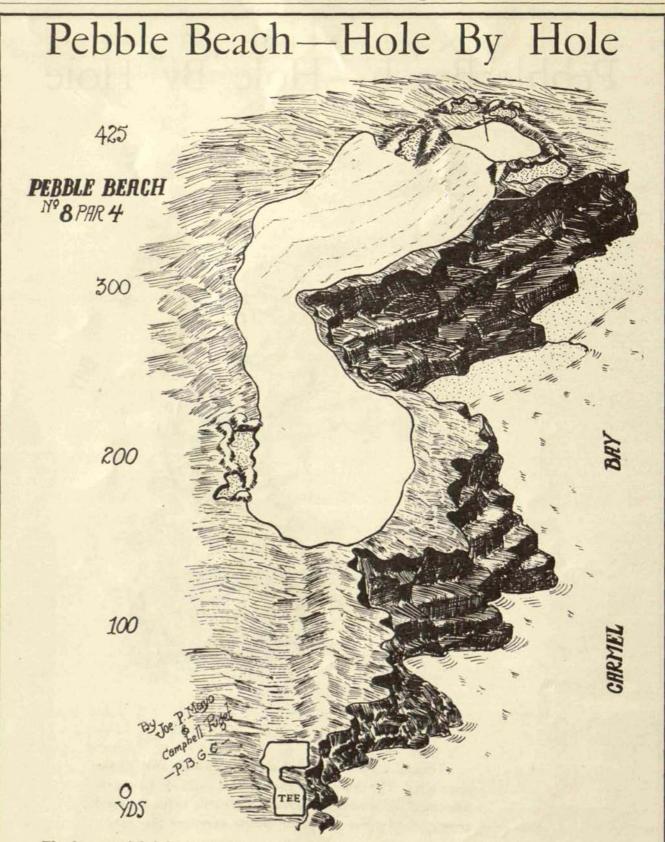

PAGE THIRTEEN

Usually a mashie niblick shot, but a hole that seldom plays alike. The green is on the extreme point of the course. Allowance for wind must be made ordinarily to hit the small green. Sand dunes and ocean closely surround this hole. PAGE FOURTEEN

The famous eighth has numerous natural hazards to overcome. Ordinarily two long shots are needed to reach the green. Rather an abrupt hill necessitates the player raising his tee shot to gain proper position at top. From the shortest point of the dog leg 130 yards of ocean must be carried to reach the well-trapped green. The banks are precipitous, 75 feet to the water, creating one of the most imposing mental hazards to be found anywhere. The slope of the ground near the green towards the ocean is apt to influence the player towards the dangerous edge of the cliffs. This second shot can be anything from a full brassie to a full mashie, depending on weather conditions. Here, as on six other holes, the sandy beaches that border the ocean give spectacular opportunities for great recovery shots. OCTOBER, 1929

ticular severity. The tee shot trap, which is seldom carried, forces play to edge of cliff and the small trap in the face of the green requires plenty of stop on a second shot with a four or stronger iron.

PAGE SEVENTEEN

The homeward journey begins here. This hole really plays over 400 yards as there is a continual rise from tee to green. The land slopes towards out-of-bounds fence on right and a three iron or more is needed to reach the exceedingly well trapped green.

Pebble Beach-Hole By Hole PEBBLE BEACH Nº 12 PAR 3 185 .100 Pytoe Mayo Campbell R _ P.B.GC Inspiring one-shotter, usually calling for spoon or two iron. Outof-bounds on right is apt to force player to easily miss green on the left. Player must have a goodly amount of stop on this shot as the trapping is close to edge of green. Usually breezes from here on in.

PAGE TWENTY-ONE

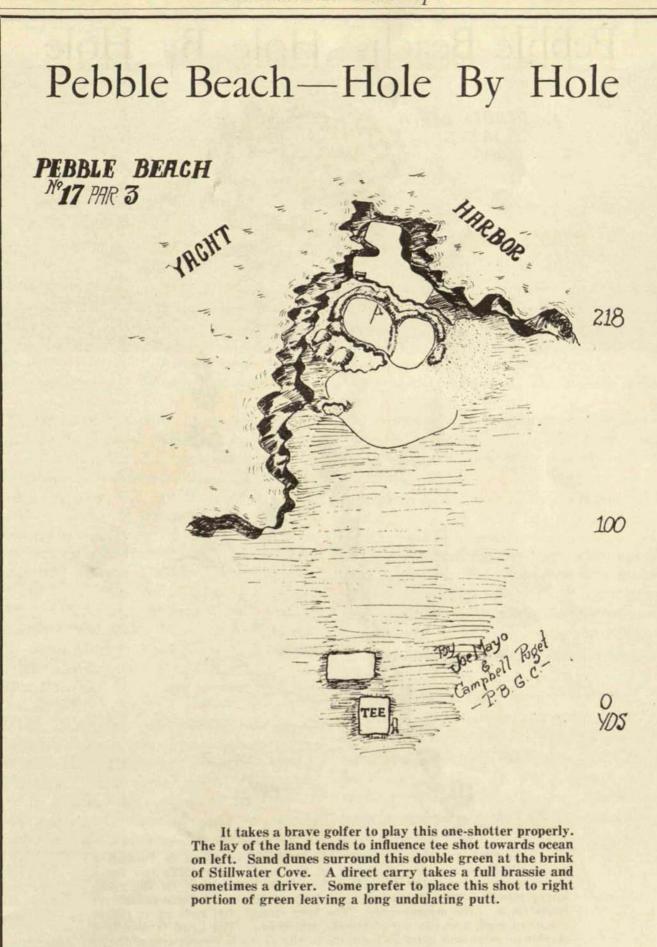

One of the finest golf holes calling for a pulled tee shot. Out-ofbounds on right; forest on left. A deep ravine of moderate carry crosses the fairway and is apt to penalize a low tee shot. The 2nd shot is most exacting and usually calls for a midiron down to a mashie. Trapping around green, while not deep, is close.

OCTOBER, 1929

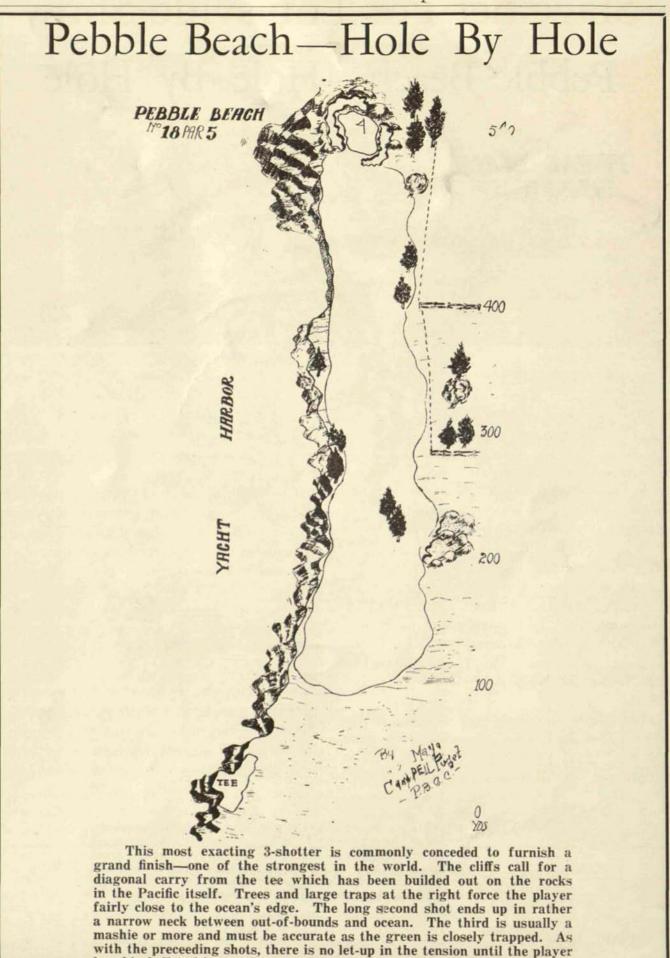

A great natural golf hole with a diagonal carry of sandy badlands. The player is forced to place his tee shot as near as possible to end of barranca on right which is the ideal location. A series of oak trees to the left combine to make the second shot more difficult; usually a 4 iron or more. This hole calls for distinct placing of shots and the natural trouble is serious.
