Don't Forget Fall Topdressing

By JOHN ANDERSON, Greenkeeper
Crestmont Golf Club, West Orange, N. J.

I AM often asked the question, "Is it best to seed in the Fall or is Spring the best time?" My answer is, if it is possible and other conditions are right, seed from August 20, till September 20. That, in my opinion, is the best time for seeding especially in the East. There is not so much chance work then as in the Spring. The ground is in good condition and the seedlings get a good start before frost sets in.

Many golf clubs in this section are faced with a problem of topdressing and seeding their fairways this fall. The long continued dry spell has ruined many fairways and as I see it, they will have to be seeded and topdressed before they recover their normal condition.

At Crestmont, we have a four years fall program of fairway reconditioning that calls for three carloads or approximately 150 tons of mushroom soil per season and this season it is to be supplemented by 150 yards of Cow Manure which we have procured nearby. This is screened through a Royer machine and mixed with good sharp brown sand, 18 yards of sand mixed with each carload.

The sand is put through the Royer with the mushroom soil and thereby is thoroughly incorporated in the mixture. It is then carted on to the worst parts of the fairways, approaches, if poor and 150 to 250 yards from the teeing ground receiving particular attention. All bare spots are spiked or disc'd and seeded before being topdressed. This is the second season of this program and we have very good results from last fall's work. You bet it pays. The fairways will not receive any other fertilization.
World’s Lowest Priced
Golf Course Tractor
Efficient! Recommended!
Guaranteed! Used by
over 1000 golf clubs.
Very powerful and stur­
dy, yet light in weight.

Seed Greens Late in August

THE greens are seeded late in August or the
first week in September. Ten pounds of
the best South German mixed bent is well
mixed in one or one and one-fourth yards of
compost and spread on each green averaging
8500 square feet. The green is spiked before
compost is applied. I find that much of this
seed germinates and replaces some of the nat­
ural grasses that are dying out at this season.

The compost used on the greens is a mixture
of 40 per cent cow manure, 40 per cent light
top soil and 20 per cent sand which has been
composting at least two years. To the first
topdressing in the Spring we add 20 pounds of
ammonium sulphate per green and again the
last topdressing in the Fall.

Except on six of our greens to which I mixed
in the June topdressing, 100 pounds each of
tobacco dust, they have not and will not re­
ceive any other fertilizer. On those six greens
I had been particularly troubled with dollar
patch, but have not seen it since, although it
has appeared at different times on the others
that did not get the tobacco dust. I am not
advocating that as a preventative but just
quote our experiment.

In closing, I would like to say to the young­
er greenkeepers, don’t forget your fall top­
dressing. Put on all you can get hold of on
your greens, tees, approaches and fairways. It
will repay you 100 per cent next season, in
the playing condition of your course, and the
appreciation of your members.

Charcoal and Compost

practice green situated close to the clubhouse.
A huge fire engine drove across the middle of
the green and it did not destroy a square inch
of sod. I have counted at least twenty women
with high heeled shoes walk across this green
and they never leave any evil effects.

I have never raised a divot on any of our
short holes in two years and never have had a

course and is very proud of the men who work for
him. Lower photo shows Ball on the left supervising
the cutting of nursery stock

single complaint. The chief cause of main­
taining a good firm surface I attribute to the
liberal amount of charcoal in my putting
greens.

Mid-West Greenkeepers

The regular monthly meeting of the Mid-West
Greenkeepers’ Association of Chicago was held at the
Aurora Country Club, July 21. In the absence of
President Binnie, first vice-president, M. Bezek pre­
sided.

It was decided to hold the next meeting at the
Midlothian Country Club and later on to visit
Knollwood.

Upon motion of Mr. John MacGregor, former
president the secretary was authorized to send a letter
of thanks to the Aurora Country Club.
