GREENSKEEPERS! What Part of Your Cost is for Labor?

No. 1 Gasoline Model Capacity 6 cu. yds. per howr

able

Jot down facts and figures and explain to the Management why they can afford a KEMP SOIL SHREDDER to save one-half to two-thirds the cost of hand mixing and screening of compost.

And the better (improved) soil you have to work with insures better greens and tees. KEMP shreds (does not grind) soil and fertilizer.

Clark & Benson, golf course builders of West Palm Beach, Fla., say:

"The KEMP has performed beyond our expectation; it has given us no trouble whatever in operation and as to pulverizing compost or wet muck soil, it works to perfection, taking the place of at least 5 laborers and performing the work in a much better manner."

Write for Catalog and Price List. Let us prove to you that KEMP "does make good." KEMP MANUFACTURING COMPANY, Dept. G, 2001 Peach St., Erie, Pa.

KEMP POWER SHREDDERS

Lake Michigan this municipal course is a real engineering achievement. For the past four years the process of filling in the enlarged boundaries of the park has been in progress. During this period thousands and thousands of scows and auto-trucks have dumped huge loads of rock and dirt so that the cost is beyond measurement.

After the fill was completed, the surface was covered with a 10-inch layer of fertile black loam and the whole improvement was protected by the construction of a substantial seawall. This is about 3 feet thick and 18 feet high but only five feet of it extends above the mean water line. The top of this wall is slightly above the surface of the soil.

Because of its location directly on Lake Michigan, this course is the only one in the Middle West which may claim to be on the "sea shore" There is usually a pleasant breeze blowing inland from the Great Lakes which makes their shores especially attractive in warm weather. The air surrounding them naturally contains a great quantity of moisture which has its effect upon turf culture. Much of the credit for the results achieved belongs to Henry E. Eicholz, assistant architect and superintendent of construction. He made the necessary topographical survey of the 168 acres and carried out the engineering plans which involved much detail.

Although the course will comprise 18 holes when completed, only 9 of them will be open for play the first season. These will be located closest to the lake. A water hazard will be provided by an inlet from Lake Michigan which will be artistically fringed with rocks and will terminate in a rock grotto. The yardage for the first nine holes will be 3,375 and for the second nine holes 3,355, making a total of 6,730 yards.

Adjacent to the course are several features of interest. To the south is a baseball diamond, football field and tennis courts. To the north on the extension of an artificially-created promontory to protect the yacht harbor, is a huge archery field. Along the lake is a 100foot bridle path.

In harmony with the surrounding beauty of Lincoln Park the new course is to be attractively landscaped. Cedar, pine, spruce and other trees are being planted. It is anticipated that vegetative bent stolons will be planted on the greens and considerable bent seed sown in the fairways.

A magnificent club house for golfers and yachtsmen is to be built at the entrance to the golf course and facing Belmont Harbor. This is to be an architectural gem.

The Sportsman's Club-A Millionaire's Vision

THE Sportsman's Golf and Country Club is the result of a millionaire's vision. George L. Chamberlain of Evanston, owner of the property, is promoting the project without thought of immediate financial return and sparing no expense to make the course an artistic masterpiece.

The development includes not one golf course but three. Besides one 18-hole course, there will be a 9-hole course exclusively for women. With 27 holes the project is one of the most complete in Chicago-Land.

The total investment, including the value of

PAGE EIGHTEEN

the land and the cost of the club house, will be almost \$1,000,000. So far as known no actual plans have been made for the sale of memberships in the club, it being Mr. Chamberlain's belief that the attractiveness of the development will be the most powerful magnet for those able to afford the best.

Mr. Al Espinosa, internationally known golfer, is the managing director of the club. He tied Bobby Jones in the National Open Championship last summer at Winged Foot. He has endeavored to have reproduced whereever practical some of the holes he has played on famous courses abroad. His knowledge of the game and of the finest courses in the world will be a tremendous asset.

Located on the south side of Dundee road between Milwaukee and Waukegan roads on the northwest of Chicago, the property is only a short distance south of Sky Harbor. Golfers will thus be able to come almost to the links in airplanes.

The construction of these golf courses is believed to have set a record for speed. The designing and building occupied 91 days. The layout was approved June 19 and the seeding was completed September 25. In the interim 80 horses, nine tractors and two steam shovels had been at work moving and preparing 102,000 cubic yards of dirt.

Both the irrigation and drainage systems are worthy of attention. In order to secure water it was necessary to lay an 8-inch pipe-line two miles from the village of Northbrook. At the entrance to the property are two pumps which guarantee the delivery of 600 gallons of water per minute. Four ditching machines assisted in the laying of 78,000 feet of cast pipe for

the watering system and over 80,000 feet of tile for the drainage system. Over 3,000 cubic yards of gravel were placed in the traps and bunkers and tile lines installed to insure adequate drainage in storm periods.

Plans for a magnificent \$400,000 club house have been designed by Holabird and Roche whose architecture is responsible for much of Chicago's magnificence. Actual work is to commence in February and completion is promised in four months. The huge building will be 283 feet long by 196 feet wide. The

This million dollar layout is being built by George L. Chamberlain of Evanston. In the foreground is Mr. Dearie, architect, and Al Espinosa, managing director of the club

SAY YOU SAW THE AD IN THE NATIONAL GREENKEEPER

men's locker room will include a swimming pool.

Other features of the development will involve an outdoor swimming pool, tennis courts and a polo field. Landscaping includes the planting of 1,600 trees.

Although some of the grass is above the ground already, it is planned not to open the courses for play until the middle of July in order to give the turf a chance to mature. The fairways were planted with 150 pounds of seed per acre with a mixture consisting of 70 per cent Kentucky Blue Grass and 30 per cent Agrostis Maritima. The greens were planted with vegetative Metropolitan bent stolons.

The Sportsman's Golf and Country Club undoubtedly will be heard from frequently in connection with open championships.

U. S. G. A. Meeting

The Green Section committee of the United States Golf Association have arranged to hold a meeting at the Hotel Biltmore, New York City, on Friday, January 10th, 1930, at 9:30 a. m. A number of interesting papers will be read, supplemented by a report of the work of the Green Section during the past year.

"Best Greens in Cincinnati"

Mr. C. A. Rich, chairman of the Green committee of the Western Hills Country Club, Cincinnati, says: "Since 1926 when we commenced reconstruction of our course I find that we have used 17 cars of

"WINDRIFT" Hardwood Humus

"Our members say we have the best greens in the Cincinnati District.

"By using the plain humus for our top dressings I believe we have found one of our greatest economies. The ease with which it is used without at any time delaying play upon our greens has greatly increased the efficiency of our operating force as well as eliminating our former expensive compost piles."

Put a few tons of "Windrift" Humus in your 1930 Budget. Do it now.

The Ohio Humus Products Company Box 95 London, Ohio JAMES A. SMITH, President

Don't Forget the Birds

E ACH morning I take great pleasure in feeding great flocks of birds and I am richly rewarded by their beautiful songs. I certainly enjoy their music. There is hardly a day goes by but what I have something for them, even in the summertime. In the winter I buy feed for them and take as good care as I possibly can. At the old place I had several bird houses, which are still there, and birds undoubtedly waiting for me. However, this winter I told my handy man that we would have to put up new houses here so the birds could get better acquainted with us.

I also have a great many Chinese pheasants which have multiplied so that we have anywhere from forty to fifty on our grounds. Some years ago we didn't have any, but by taking care of those that happened in, such as buying cornstalks and corn and tying these to the trees so the pheasants could get hold of the feed after the snow arrived, they must have gotten together and said, "Let's make Charlie Erickson's place our permanent home." I am really very proud of my birds.

Well, boys, I guess I have said my say, there is just one more thing and that is I wish you all a Very Merry Christmas and a Happy New Year, and I hope I will have the pleasure of seeing a great many of you in Louisville in February.

> Yours very truly, CHAS. ERICKSON, (Greenkeeper, Minikahda Club) Minneapolis.

Larger and Better Tees

By JOHN ANDERSON, Greenkeeper Crestmont Golf Club, West Orange, N. J.

N visiting some of our golf courses one is struck with the need for larger and better

teeing grounds. Even on some of the championship courses, some teeing grounds are poor, mostly on short holes where the tees are much too small.

The tee ought to be at least large enough to allow the markers to be changed six or seven times without being twice in the same place. This gives the turf at least a week to recover after hard playing for one day.
