No Water is WASTED

The Thompson Master Sprinkler is a scientifically designed greens and fairway sprinkler. It does the job of keeping the grounds greener for a lower cost because it has been designed to utilize ALL the water.

The Master Sprinkler absorbs little of the force of the water. The full energy is dissipated in a rain-like spray by the two nozzles—one for the outer-sweep and one for the inner-sweep, both combining for perfect coverage.

A three year absolute guarantee shows our confidence in the rugged construction of this Sprinkler. The Thompson Quick-Coupler and Quick-Coupling Valve, used in permanent underground installations, allows the operator to connect the Sprinkler and turn on the water, all at the same time—with one twist of the hand. Send for our FREE catalog for complete information.

CHECK these features found only in the Thompson Master Sprinkler!

1. Master Sprinkler gives greater uniform coverage without wasting water.
2. Operates on pressure as low as 20 lb.; with an average of 45 lb. pressure it will cover an entire acre with only 8 moves.
3. Low center of gravity, does not tip over easily.
4. Offers less of a play and wind hazard.
5. Three-year absolute guarantee.
6. Light in weight—9 pounds including roller base—easy to move. Saves money on labor bills.

PAGE TWELVE SAY YOU SAW THE AD IN THE NATIONAL GREENKEEPER
at my greens so I can check on the practical application of the Dickinson theory of large brown-patch control.

All of us are studying the fertilization requirements of our courses so the addresses of Messrs. Grantham, Sprague, Smith and Noer were bound to have practical application in my work at Sunset Ridge. The remarks of Wendell Miller on the effect of course condition on the golf club’s income also stirred up considerable thought on the part of greenkeepers for the broad aspect of their work was presented in such a way that it should help in getting for the course maintenance budget the prime consideration it deserves.

The educational conferences this year impressed me as being admirably designed to set forth the findings, opinions and inspirations of noted specialists in such a manner that they would arouse the working greenkeepers to a focused thought along the lines suggested by the expert’s appraisals of field operations. Greenkeepers are not much on making public addresses and for that reason any Greenkeepers’ convention program most definitely serves the men of our business when it will get them to exchanging notes in their own informal talks at the conclusion of the set conference sessions. When the program speakers provide the greenkeepers not only with some specifically helpful information but with an urge to debate among themselves the practical applications of the speaker’s remarks, then the educational conference exercises its most valuable function.

(c) Having attended each of the conventions since the start of the National Greenkeepers’ Association I believe that the development in program of practical, dollars-and-cents application to course maintenance work has been so marked that it has saved the nation’s golf courses hundreds of thousands of dollars in the elimination of wrong methods and the adoption of thrifty and effective standard practice.

In furthering this intimate application of the convention’s teachings I would suggest that speakers at future conventions prepare their addresses in advance and that the program committee then send copies of each of these addresses to at least two or three practical greenkeepers so these practical men could pre-
HARDIE makes sprayers and spraying equipment for every golf and country club need. Write for catalog.

I do think that a closer tie-up between the educational conferences and exhibit could be made by allowing representatives of the manufacturers, places on the conference program with practical addresses on equipment buying, operation and maintenance.

GOLF NEWS

The Jerseyville (Ill.) golf club will open its new nine hole course Decoration Day. T. W. Kirby, Jr., is president and Joseph Graf secretary-treasurer.

The Dayton (Ohio) Country Club has voted a program of $200,000 to be spent in remodeling the club house and the work is already under way.

Chicago promoters are looking over land at Kanakee (Ill.) with the idea of building a new 18-hole public golf course.
