What They Say About—

SCOTT'S

10-6-4 TURF BUILDER

"We used Turf Builder on our greens last year and are using it again this year. Our experience has proved that Turf Builder is the ideal fertilizer for holding up color and developing healthy turf," writes Frank Balding, Greenkeeper at Sunnyside Golf Club, Decatur, Illinois. . . .

O. M. SCOTT & SONS CO.

uous flow of descending, hence dry, air from south to north over the surface of central and eastern United States.

"In other words, the normal movement of 'highs' and 'lows' was interrupted by a persistently stagnant state of the atmosphere.

"Conditions attending drouths are well known to meteorologists, but just why these should establish themselves, and persist, as in 1930, has not as yet been determined."

New Jersey Field Day

A field day program devoted entirely to turf culture will be held at the New Jersey State Agricultural Experiment station on Monday, June 15, 1931. The meeting is sponsored jointly by the New Jersey State Golf Association, the New Jersey State Greenkeepers Association, and the State Agricultural Experiment station. It is expected that a large number of people interested in producing and maintaining turf on lawns, golf courses, parks, etc., will be present.

The program will begin at 3 p. m. (Daylight Saving Time) on the experimental turf plots of the Agronomy Department at the College Farm, New Brunswick. Each of the several hundred plots will be labeled, so that visitors may draw their own conclusions as to the effects

of the various treatments and conditions. A discussion of the field experiments will be conducted during the afternoon.

At 6 p. m. the group will adjourn to the Hotel Woodrow Wilson, where dinner will be served at a cost of \$1.50 per plate. Following the dinner, there will be an evening program of talks on turf culture and a discussion of problems. Several speakers of national reputation will address those assembled.

Lakeland Municipal Course

The municipal golf course at Lakeland, Fla., is the rather famed Cleveland Heights course, built for the developers five years ago by Toomey and Flynn. It is a standard 18-hole championship course, rolling in its surface with no two shots alike. Not only is every green a different sort of a shot, but the course runs its way through a citrus grove so that in season players may pick oranges from the trees as they go along.

Dickinson Comes West

The next meeting of the Green Section of the Central Ohio District Golf Association, 513 Chamber of Commerce Bldg., Columbus, Ohio, is to be held at Scioto Country Club on June 12th, under the leadership of Prof. L. S. Dickinson. His subject is "Greens and Fairway Mowers."

This meeting is to be opened to the public, and would appreciate it if you would announce it in your next edition of the NATIONAL GREENKEEPER, stating that the only charge will be for lunch. It will be necessary, however, for them to make a reservation, so that arrangements can be made for lunches.

The Peerless is the only sharpener that replaces dull cutting units with keen razor-like edges. Sharpens all makes of power, horse and hand mowers. A great time and money saver.

Helps Keep Lawns Trim

With the Peerless Mower Sharpener dull cutting edges give way to keenness that enables mowers to run easier, on less power, with more speed. New reconditioner permits "lapping in" with emery paste after grinding.
