

**This New, Simple, Easy
ADJUSTMENT
Controls Speed
of Rotation and
Enlarges the Sprinkled Area . . .**

HERE is another outstanding feature added to the many advantages of the LARK . . . A worm-gear adjustment which makes it easy to control rotation of the main stream and maintain rotation no faster than one revolution per minute. Slow rotation avoids air resistance, permits farther throw of the main stream, and allows even sprinkling over the largest possible area.

It sets the nozzle of the main stream in any desired position and keeps it there. No bother or fuss. No tools needed. Simply turn the worm-gear as illustrated.

Other advantages—never-failing performance, EVEN distribution; no tearing up of turf; economy of water. No wonder The LARK is golfdom's leading sprinkler.

● If you want sprinklers that are SAFE for night sprinkling; that give the grass a thorough drenching; that are always ready when you want them—buy LARKS. Ask about our 10 days' trial offer.

Philadelphia News

By M. E. FARNHAM, Secretary, P. A. G. C. S.

THE regular monthly meeting of the Philadelphia Association of Golf Course Superintendents was held on Monday, March 7, 1932, at the Llanerch Country Club, Llanerch, Pa. Twenty-five members and guests were present, numerous regular attendants evidently staying at home rather than contend with the difficult traveling due to the snow storm of the night before.

The meeting was called for 4 p. m. It seemed a little early to attempt any golf and the weather confirmed our doubts. Dr. W. E. Fleming of the Japanese Beetle Laboratory, Moorestown, N. J., was the guest speaker. Dr. Fleming gave the results of the past three year's work with lead arsenate as a grub poison, dealing particularly with its behavior when mixed in the soil or spread on top. His reports are extremely interesting. Reports of this meeting and its subject matter have been published in the local papers and I hope the near future will see wider publicity given Dr. Fleming's information.

After dinner, the question box was opened and some time spent in discussing the questions therein, Dr. Fleming also answered further questions. Certain subjects pertaining to the National Association were also discussed; in fact, the discussion was so active that the question was asked if all local groups were taking as much

discourage
"brown-
patch"

"Use Regularly" Say
Authorities

SPIKE DISCS aerate the turf and produce a moisture-retaining mulch. Thus the ground does not become hard-baked and "brown-patch" is discouraged. Essential also when re-seeding, fertilizing and top-dressing. Seed and fertilizer settle in the perforations made by Spike Discs and are not blown or washed away.

Golf Course Economy

(Concluded from page 18)

Attend all the meetings you possibly can and if you are able to attend a short course at one of the agricultural colleges it will surely pay you. If you are going to be a greenkeeper, be a good one and it will pay.

When you economize, be sure it is true economy and not false. Will the dollar you save this year have to be spent along with some extra ones next year in order to correct this year's mistakes. Look before you leap and when you do leap be sure to jump far enough to make it worth while.

The Buel Perforator

J. F. Buel, Prospect Street, Woburn, Mass., has placed upon the market a perforator of the spike roller type, which he claims overcomes the drawbacks of hand and ordinary roller methods and assures perfect spiking for seeding, fertilizing and watering. It is simple to handle requiring only two men to operate it and is equipped with two auxiliary wheels which make turning and transportation easy. A descriptive circular will be sent upon request.

will keep new-cut Greens free of ant hills and worms and not injure turf. Trial order to make fifty gallons.

Philadelphia News

(Concluded from page 31)

interest in the activities of the National. The hope was expressed that they are.

After a wide open winter this district is now having a taste of real winter, snow, temperature, and wind. It is rather trying as many of us were on the verge of starting various seasonal activities. However, it will not be long now before the mowers are out.

Illinois Grass

Prominent golf and country clubs are using Illinois creeping bent and turf, and now they have available blue grass turf for those courses that prefer blue grass instead of creeping bent. Among prominent users is Stanley S. Pelcher, Municipal Course, City of Superior, Wisconsin.
