Rehabilitating Old Courses

(Concluded from page 7)

If your club board of directors has in mind any extensive alteration of your golf course, study the problem yourself, then go to your chairman of greens, or whoever you deal with, and make yourself heard. If he has in mind hiring some alleged authority on golf construction you who know to what in legal parlance is called a "shyster" (a fellow who doesn't know his stuff), tell him the danger of such a procedure.

Go over the course with your chairman, and show him how much money it will cost to do the job well—to have interesting greens and hazards, and to carpet the fairways with real turf. Try to find out how much the club intends spending, and figure out for yourself whether it will do the job. If you are convinced the money allotted will not cover materials and labor, speak your mind. Better to have an old-fashioned course, well kept up, than a fancy new one with only a few blades of grass here and there.

ALVES DOES NOT ADVISE RECONSTRUCTION

I do not advise any reconstruction. Far from it. I hope that there will be much rehabilitation in the next few years; it will make more work for the bona fide architects, seed salesmen, and the equipment manufacturers, and the wide awake and progressive greenkeeper. But, being an architect and greenkeeper myself, I would be a poor business man, if, even in these times, I attempted to encourage haphazard jobs and slipshod work that, in the end, would help none of us. If the club has the money and if conditions are correct—go ahead; if not—forget it.

Municipal Maintenance

(Concluded from page 17)

Complete fertilizer is mixed in the top dressing with the mixer because a uniform mix is obtained. This plant puts our top dressing program on a business-like basis.

Progress can be made by the greenkeeper when he is responsible to one man. He happens to be the County Engineer on my course. That is not the case on the average municipal course. There is a manager of the househouse who likes to tell the greenkeeper what to do. Then there is the Park Foreman, Recreation Supervisor, General Superintendent and Park Commissioner. The greenkeeper is responsible to all of them. He can not buy his own material. He can not hire his own men. No one takes a personal interest in him, no one encourages him. He works hard and tries to make his course the best he can.

WELFARE LABOR IS A PROBLEM

A new problem reaches the municipal greenkeeper that does not affect other greenkeepers. It is what we call welfare labor. The city issues grocery orders to many unfortunates and they have to work them out on the golf course. They stay three or four days and then new ones are sent out. A crew may consist of bank clerks to bricklayers. Many of them are too weak to work. Many can never learn to do manual work. Others will not work. You have to be with them all the time, because they have a habit of picking up golf balls. You can not let them go. It is trying to do things well under these conditions, but we appreciate that the other fellow may have it just as hard or harder on his course.

The municipal course has to be self-maintaining. Golf receipts have dropped off. Competition has increased. It will be necessary to maintain good courses on less money. All we can do is work hard and intelligently, hoping that Mother Nature will stick with us.

Turf Culture News

(Concluded from page 23)

Association have disbanded or gone bankrupt in the last three years, golf continues to boom in Cincinnati, for it was learned Tuesday that plans are under way for the building of another golf and country club in this district.

The proposed new club may be built on a site overlooking the Little Miami River above Remington. Besides an 18-hole golf course facilities will be provided for tennis, aquatic and equestrian sports.

Charles E. Dornette, attorney, is one of a group organizing the club.

Stewart & Stewart, architects, are designing and receiving bids on the clubhouse, which will cost $60,000.

PAMPA, TEX.

All that is needed to place the Country club golf course in the best condition of the year is a nice heavy rain. The rough is clear of weeds and the fairways have been rolled until the ball has a long, straight roll after flight.

Greens and tee boxes have been worked over and the putting surfaces are deep and even. The new drags give any kind of surface desired.

Caretaker Autry is waiting for the rain to make the grass green before he rolls the course again.
