# ROSEMAN HOLLOW ROLLER MOWERS

U. S. Patent No. 1327924; British 154783; French 506456, give us the exclusive right to gang ROLLER TYPE MOWERS. If it is not ROSEMAN—it is an infringement.

## Calomel for Brown Patch

Probably one of the most destructive turf diseases known on a golf course is Brown Patch. Experiments have been conducted over a period of several years by the U.S.G.A. Green Section at the Arlington experimental grounds, and every endeavor has been made to discover some chemical treatment which will be not only effective, but economical as well. During the 1926 season the Green Section has determined that Calomel, applied at the rate of 1/5 pound to 1,000 square feet of area controls Brown Patch, and prolongs the protection of the grass against further encroachments of the disease. Calomel, even if applied twenty-five times the strength necessary, will not burn the grass plants. Scientific investigation such as the Green Section conducts is the only form of insurance against turf diseases, and this latest accomplishment will be fully appreciated by all members of the National Association.

## CONGRATULATIONS

To the Greenkeeper:

We have often wondered why you did not have a magazine of your own. Now you have and now we are glad to be with you on a yearly contract. We make sprinklers. We make good sprinklers. We make the GOLF KING sprinklers. They are not a back-yard assembly of pipe fittings.

*Here is one of them*

They are manufactured by expert machinists from the best material obtainable and will cover greater area than any other sprinkler ever offered you. Sooner or later all exacting greenkeepers will reach the viewpoint where makeshift sprinklers altho cheap, will receive no consideration whatsoever, but will demand a sprinkler that will enable them to meet the expectations of the green committee.

Unquestionably the GOLF KING is such a machine. It is so distinctly superior, so entirely removed from others that it must be their ultimate choice.

We make fertilizer distributors, quick couplings, invisible valve assemblies. We are irrigation specialists.

FRESNO, CALIFORNIA

# No wonder greenskeepers are changing to Fairway Hose!

*Read the remarkable  
facts brought out  
in this letter*

This hose won't  
kink; it with-  
stands abrasion;  
and to discourage  
theft and add  
prestige to the  
course, the hose  
is labeled in white  
with your club's  
name.

AUGUSTA COUNTRY CLUB  
AUGUSTA, GA.

October 6th, 1926

The Republic Rubber Company,  
Youngstown, Ohio.  
Gentlemen:

I take pleasure in stating  
that the "Fairway" Hose purchased  
from you has given perfect satis-  
faction. Our Water Pressure  
ranges from seventy (70) to one  
hundred and thirty (130) pounds,  
and with apparently no injury to  
the Hose.

To date we have purchased Five  
Thousand feet (5000), viz: One  
Thousand feet (1000) of three-  
quarter inch, and Four Thousand  
feet (4000) of one inch.

After a careful comparison  
with other brands, your Hose was  
selected, and has given more than  
satisfaction.

Yours very truly,  
Augusta Country Club,  
*M. H. Harlan Jr.*  
Chairman Greens Committee

The New  
**TORO**  
Junior  
Tractor

Announcing Two New **TORO** Machines

**The TORO Junior Tractor** meets a well-defined need, among both the eighteen and nine-hole courses, for a small, inexpensive and economical tractor to supplement our Standard Five-Unit Golf Machine, already established on several hundred of the larger clubs throughout the country.

For the larger club, the TORO Junior is strictly a supplementary machine. It is provided with ample power to carry three 30-inch mowers. In addition, it is well able to handle general hauling around the course, grading and construction work, together with numerous other drawbar needs.

On the smaller nine-hole courses, it can be used very profitably as the main power unit. It comes in a variety of ways to fit almost every need, including short wheel

base, front end mowing attachment; truck style with platform and drawbar for pulling the mowers behind; truck style with all-steel dump box. Barth solid rubber tires are optional equipment for use on hard roads.

**The TORO Tee Mower** is light in weight, exceptionally easy running, and is built for close, clean cutting. The drive wheels represent a new departure from the older styles in that they are slightly inset from the side frame and are *back* of the revolving reel. This results in many advantages. The machine can cut more closely around trees and shrubs, has considerably greater traction and consequently greater ease of operation.

*New illustrated Catalog, showing complete line of maintenance equipment will be sent on request.*
