Features of the New 19-Inch and 24-Inch Models
1. Will produce a finer cut than any "push type" mower.
2. Positively will not pack your greens. All major castings made of the same special grade of aluminum as used in aeroplane construction, combining great strength with extreme lightness.
3. Any boy can operate them without fatigue; makes your help happy and contented.
4. Will cut your cost of greens-mowing 50% to 75%, resulting in surprising savings.

Demonstrations of these new mowers the past year on prominent courses from Coast to Coast and before the United States Greens Association at Washington, D. C., have assured their reception as a distinct triumph on the part of Jacobsen Engineers—a tribute to Jacobsen experience and skill as builders of quality power mowers.

Their ability to do beautiful work on any green has been thoroughly proven, over any undulations that a hand mower will handle, and of course, with a marked saving in time and labor. They do the work of two and three good men with hand mowers. Every objection to power mowers on the ultra modern green has been removed by these new models.

Line up your new equipment now before the season is on. Let a Jacobsen Representative bring a movie projector to your office and show you how Jacobsen Mowers perform—convincing visible evidence. There is no obligation. Write for literature and names of users.

Golf Course Drainage
(Continued from page 21)

Capillary moisture and drainage:—Capillary moisture has no direct relation to underdrainage though it has a very definite and important bearing upon the results and effects of drainage. When the plane of saturation is lowered by the use of underdrains the moisture necessary for grass production must be supplied by capillarity.

Hygroscopic moisture:—This is the least important of the three forms of soil moisture and in amount it is relatively very small. It is the moisture which condenses from the air onto the soil grains, the condensation taking place either at the surface or in the soil, if it be so open as to allow of free circulation of air.

(Each of the articles by Mr. Miller which will appear in following issues will specialize on a phase of soil drainage, including a discussion on the benefits of drainage, determining where drainage is needed, the design of tile drainage systems, the mechanics of drainage installation, and the construction of drainage accessories.)

The Best Greenkeeper
In The World

The faults enumerated above makes this grass an ideal rough. It will grow on poor soil. Its dwarf habit of growth makes it economical to maintain. There is not enough to hide balls. In the Northern States it will last for many years when not cut short. Sheep's fescue, a coarser grass with a distinctly bluish cast in color, has often been recommended for this purpose. This was due largely to the fact that red fescue seed was formerly much higher in price. But since green keepers have generally come to the conclusion that red fescue is of little value for putting greens and much less is used than was the case a few years ago the price of the two sorts has been about the same, with red fescue sometimes selling for less than the sheep's.

Meadow Fescue

Some unscrupulous dealers have highly recommended and sold meadow fescue for fine turf purposes. One man in the West got into conflict a few years ago with the Postal authorities for selling seed of this grass under a high-sounding name. Meadow fescue is a coarse farm grass, resembling very much the rye-grasses. It has no special value for fine turf.

There are a number of other fescues sometimes listed in seedmen's catalogues such as fine-leaved fescue and hard fescue. The fine-leaved fescue usually turns out to be the same as red fescue and the hard fescue is another name for sheep's fescue.
Mr. Greenkeeper

In making up your 1928 budget why not use the J. Oliver Johnson catalogue. You will find a complete list of SEEDS and EQUIPMENT, all of which is in stock and immediate shipment; no delay. Our 1928 catalogue will be ready January 15th. A postal will bring one to you. Many new items and a price reduction will be noticed. See our 20 booth exhibit at the 3rd International Golf Show in Chicago, March 12-17.
