Golf News

KNOXVILLE, TENN.
Lou Mills, Greenkeeper, has announced that the new golf course, Municipal, was opened for play first of August; Fred Parkhurst, recreation chief, has announced that the new clubhouse will be ready the last of August.

MIAMI, FLA.
Several bids for leasing the country club and golf links at Coral Gables have been received, Gene Williams, City Manager, has announced. George C. Stembler is now operating the club, contract for which will expire next October.

MAGNOKELA, IOWA.
Plans are under consideration for purchase by the city of the Fair Grounds property, to be used as golf course and recreation center. Further announcements are to be made in the near future.

BOSTON, MASS.
Work has started on the Blue Hill Golf Links, under supervision of Donald Ross, nationally-known architect. This is a venture of the Metropolitan District Commission.

WHITESTown, Wis.
The Whitewater Country Club is ready to try out the new 9-hole golf links, located just outside the city limits on highways 89 and 59. Olaf Johnson, President.

JOLIET, ILLS.
The new west side golf course, a public links, was formally opened in July. This course is located two and one-half miles west of Joliet on Barr Highway. Roger Ervin is manager.

BERGENFIELD, N. J.
The Rivervale Country Club, whose golf links have been under construction for some time in Upper Rivervale, adjoining Rivervale Road, was thrown open to the public, July 4th. John Handwerg is owner and manager of the club.

HOUSTON, TEXAS.
A new appropriation has just been made for additional work on the Memorial Park Golf Links, the new nine-hole course having been cleared. Mr. E. R. Spotts is Chairman of the Board.

ROCKWOOD, TENN.
Kingston, Harriman and Rockwood are laying plans to build a joint clubhouse and golf course by a merger of golf interests of the three towns. Mr. L. N. Barrett is President of the Rockwood Golf Club.

Ft. WAYNE, IND.
Plans for new golf course have been approved by the Community Association here, to be known as the North Highlands Golf Course. Godfrey Glabough is President of the Association and presided at the meeting.

CLARE, MICH.
A meeting of the Clare Chamber of Commerce was held for the purpose of completing the organization to sponsor the new golf course to be built by William Bowler, of Detroit, on his farm four miles north of Clare.

WICHITA, KANS.
A new 9-hole golf course, on the North Lawrence Road, 4 miles north of the Stearns farm race track, has been opened by J. N. Reaugh; it will be increased to an 18-hole course very shortly.

GADSSEN, ALA.
Construction of an 18-hole course on Glencoe Highway, two miles out of Gadsden has been started and they expect to complete nine holes latter part of current month. This will be a public golf course.

CLANTON, ALA.
Business and professional men of Clanton recently organized a Golf Club. Work has started and this will be the first golf course Clanton has yet had—to be a nine-hole course.

EVELETH, MINN.
Work on the 9-hole golf course near St. Mary’s Lake is progressing rapidly and the opening is not far off, according to Mayor Frank Campbell.

BREWSTER, MASS.
The Brewster Country Club opened the first nine holes of its new course, about a quarter of a mile from Kings Highway, in East Brewster. Mr. Samuel P. Sears is President.

GILLETTE, Wyo.
A new golf course is being projected here by Mr. Wayne George, of Spearfish, Wyo. Proposal is for nine-hole course. Ad Johnson, of Gillette, was elected President.

FARMINGTON, Colo.
Farmington will soon have a nine-hole golf course, according to Mr. H. V. Steele, of Farmington. The course is being constructed along the Animas River.

Dawson, Ga.
The Dawson Country Club expects to have its new 9-hole golf course completed by middle of August. Dr. S. P. Kenyon, Chairman.

Wayside Plant Food

Wayside Gardens, Mentor, Ohio, are receiving many inquiries for their "Plant Food," for use on golf courses and estates this fall.

This product is a real foundation fertilizer and only one application a year is necessary as it lasts from twelve to sixteen months. Being organic, results are the same on all soils.

Wayside Gardens "Plant Food" is made for the specific purpose of feeding grasses or plants low at the roots, which helps to build a thick sod and consequently a very dense and sturdy growth.

This fertilizer is ideal for late fall top-dressing, especially on turf which has been thinned out and starved through the hot summer months.

R. H. WHEELS are stronger

For all Fordson Tractors

Rims do not bend—50% better traction—rounded edges—easier steering. Hundreds used for replacing old, injurious wheels. Sold in singles, pairs or full sets.

R. H. Tractor Wheel SPUDS

quickest to put on or take off, increase tractor efficiency and cultivate turf... that's why more than half the U. S. and Canadian clubs use them. Durable and low priced. All sizes for all purposes Sample spud and circular on request; advice make of tractor and purpose for which intended.

If your Ford or equipment dealer cannot supply, write direct to

The Battle of 1931

(Concluded from page 5)

weather increased the humidity as well as the fungi. Greens dried out before night. With early morning watering during hot weather, quickly recovered.

5. Balanced feedings during the hot, humid weather, tended to toughen the turf and in a measure make it more nearly brown patch resistant. The most satisfactory complete fertilizer seemed to be the one carrying a heavy percentage of Phosphorus with comparatively light Potash additions. The nitrogen percentage seemed safe if it equaled the total of phosphorus and potash.

6. After improper drainage as well as improper physical condition, a growing tendency to over nitrates feeding was the prime cause for serious trouble. Delicate foliage on turf was grown at a time when a strong, vigorous turf was most needed. Heavy nitrate feedings from Ammonium Sulphate or from one of the organic feedings which during hot, moist weather, could break down by putrefaction and
become too readily available, should be watched more closely at that season.

7. Over stimulation to foliage development, because of this one-sided fertilization should be classed as one of the major causes for the extent and duration of the fungus attacks. Where the feeding balance was maintained, this over-stimulation was impossible.

8. Deep and rather infrequent watering with the best available sprinkling equipment, with hand watering of the greens edges.

9. Seeding fairways to turf which the soil most easily grows rather than trying to compel it to grow one unsuited to the soil conditions in which it must exist.

10. Another year with the knowledge they now have and with funds available, the webworm will be less of a menace and should be controlled.

These and many more are actual suggestions from greenkeepers I have had the pleasure of hearing this summer. There will be many new problems possibly in 1932, but if they are thinking straight and as directly as they are, we need have no fear of the future so far as their responsibility is concerned.

Ohio Humus Installs Drying Plant

For the past fifteen years there has been a steadily increasing demand for a type of organic matter known as humus (completely decayed vegetation) for the reconstruction of soils and for use by the producers of fertilizers as a basis of all high-grade products.

Many of the best of these organic products are capable of holding approximately 175% of water, and this moisture retaining power has been of the greatest value in the reclamation of wornout soils, especially when decay has advanced beyond the peat stage to the formation of humus.

As the majority of these products on the market are taken from but partially drained lands, the moisture content of shipments has averaged from 50% to 75% for each ton of humus shipped. This would mean that the purchaser would pay freight and delivery charges upon 1000 to 1500 pounds of water for each ton received.

The atmospheric moisture will remain at an average of 10%. Should a fertilizer manufacturer use an organic product containing 50% of moisture in the manufacture of a complete fertilizer, due to the average of 10% moisture in the air, his product would rapidly lose weight.

Toro Opens New Office

Toro Mfg. Company announces the appointment of a new Toro distributor in the Cleveland, Ohio, district. His name is Merritt C. Johnson, and he will operate under the name of the Cleveland Toro Company, with headquarters at 2160 E. 28th Street, Cleveland, Ohio, Phone-Cherry 5161.

Mr. Johnson will be ready to serve Toro users with a complete stock of equipment and full shop facilities for overhauling and repair.
THE ROYER
COMPOST MIXER

Saves in Labor Costs

Read what the Chief of Parks of the National Capital Says About His Two ROYERS:

PUBLIC BUILDINGS AND PUBLIC PARKS OF THE NATIONAL CAPITAL

Washington, D.C.
February 9, 1931.

Dear Sirs:

Your communication of January 28 in reference to the two Royer Mixers which this office purchased from your company has just been received.

We first purchased a small model which proved so satisfactory that we decided to purchase one of the larger type mixers. The small mixer is being used permanently by the propagating gardens and greenhouses and the larger machine in the preparation of compost for lawn areas throughout the park system.

We have found that the Royer Mixers have saved us considerable in labor costs as it has eliminated all of the old hand-mixing methods.

F. T. GARTSIDE,
Chief, Park Division.
