During the past several years, an increasing number of municipalities have implemented water use restrictions for turf for all purposes. These restrictions have become a serious concern for those responsible for premium field conditions for many sports such as soccer, football and baseball. On April 6, 2006, the Sports Turf Association hosted a workshop, the intent of which was to bring together those involved in managing the water supply of a municipality in the best interest of its citizens and those responsible for the management of quality sports turf surfaces for use by its citizens. In order to further distribute the wealth of information presented, we are pleased to publish summary articles provided by our speakers. We extend our thanks to them for further participating in this project.
