## WEEDS NEVER SEE THE LIGHT OF DAY.

Lurking just beneath the surface are thousands of tiny weed seeds, threatening to ravage lawns and established ornamentals. Fortunately, Pendulum® preemergent herbicide stops more than 40 broadleaf and grassy weeds dead.

Pendulum is a proven performer, offering well over a decade of unsurpassed, season-long control and unmatched value to maximize your profit margins.

It's a combination that's earned Pendulum a higher satisfaction rating from LCOs than any other preemergent.\*

To learn more about how Pendulum can make sure weeds never see the light of day, call 1-800-545-9525, ext. T3257 or visit [www.turffacts.com](http://www.turffacts.com).

Always read and follow label directions.

## THE BROADEST CONTROL AVAILABLE.

Pendulum® preemergent herbicide controls 21 annual grassy weeds and 24 annual broadleaf weeds—including crabgrass, goosegrass, oxalis and spurge in turf. Pendulum is also labeled for over-the-top weed control of numerous ornamental species and can minimize hand weeding in ornamental beds for up to 8 months.

## THE FULL-SEASON HERBICIDE.

Pendulum herbicide provides control throughout the entire season, even in warm climates with extended periods of weed germination. The reason? Its low volatility and slow decomposition characteristics keep it active in the soil longer.

## FLEXIBILITY FOR CUSTOM CONTROL.

The Pendulum® preemergent herbicide product line includes sprayable 3.3 EC and 60 WDG formulations, as well as a 2% granular formulation. Application rates vary from 1.5 lb. a.i./acre to 3.0 lb. a.i./acre for turfgrasses, and up to 4.0 lb. a.i./acre for ornamentals, depending on the weeds controlled and duration of control desired.

## WEEDS NEVER SEE THE LIGHT OF DAY.

Broad-spectrum, season-long control. Application flexibility. Exceptional turf-grass tolerance. And cost-efficiency. That's the combined power of Pendulum.
