

PRESIDENT'S MESSAGE by John Engen, CGCS

Many thanks for the great turnout at Butte Creek. I would also like to thank the membership for being so good about sending in the reservation cards. I estimated 75 people from the cards sent in and some telephone reservations and we had 77, so that's almost perfect. I'm sure we could have spent a couple of more hours asking our speaker Mr. Roy Rutz questions about Pesticide Licensing. I believe several things could come from this meeting with the follow up we will be doing. We hope to develop a grandfather's clause which would lower the minimum requirements for applying for a pesticide advisors license for 1 or 2 years. This would allow experience to replace the 60 units of college credit. We also plan to start working with community and state college and receive college credit for all the educational functions that we attend. This will help the younger fellows that do not have the minimum requirements and do not have time to go back to school. I have already discussed this with Butte College and they are very receptive and will help our cause in any way they can. We will have to enlist the help of several colleges as they are only able to work within their own district. If anybody has some contact with education in their area and would discuss this possibility of receiving college credit for our educational functions, it would be greatly appreciated.

While I have pen in hand I would like to ask everybody for help on sending in articles for our Newsletter. Our Newsletter will only be as good as the effort put into it. All you Class F members could help a lot. I'm sure in your travels, you see many things of interest. Jot them down and send them to Myrtle.

ORINDA COUNTRY CLUB - by Gurmit S. Sandhu

Orinda Country Club was incorporated on June 17, 1924. The 159 acres occupied today by Orinda Country Club was once the part of a land grant given to the Castro family in 1841, and called "El Sobrante".

In 1922 Mr. E. I. deLaveaga began to develop the club. First came the Lake Cascade, with a waterfall spilling into the swimming pool; then the Golf Course--only five holes, nine and finally 18 holes, Club House last. Originally, all members purchased the home sites prior to applying for membership, most of them living in East Bay, using Orinda for week ends and summer enjoyment. Two of our best known golf course superintendents all over California and United States, Elmer Border and Walter Boysen worked for Orinda Country Club and later in their careers, both of them served as Presidents of the Golf Course Superintendents Association of America.
