

OUR HOST FOR MAY - "Jack" Jagur

Jack had always wanted to work on a golf course since a young boy. Born in the Fiji Islands, he watched fairways being mowed at a golf course about a half mile from the school he attended. Jack came to this country in 1962. In 1963 he got his chance to work on a golf course. His first course job was at El Dorado Royal CC under Sam Singh. After a short time he went to work for Bob Baldock on the construction of the Linwood Golf Course in Sacramento. The latter part of 1964 he moved to Valley Hi. There he worked under Dick Viergever and became the assistant. Four years passed and another move came. After a short time with Don Baker at the Meadow Club, Jack got his first position as a golf course superintendent. In 1968 he took over the maintenance operation at El Macero Country Club. You might say his boyhood dream came true.

El Macero Country Club was built in 1960 and opened the same year. The course is flat with lots of trees. The course measures about 6600 yds. The greens are well trapped, also there is out of bounds on every hole. Greens are Seaside and Poa, Fairways, Common Bermuda. In the past 10 years Jack has been installing drains in all of the greens. He says that it is one thing that has really helped. Also he has just completed installing automatic irrigation around all his greens. REL

IS THERE JOB SECURITY? by Robert E. Livesey

In recent months there have been many comments from the members about job security. At the meeting at Menlo CC several approached me on this subject. Having just enough knowledge on this to get me in trouble, I had to look further, to come up with some information. There is very little on this as far as the superintendent is concerned.

The closest comparison that can be made of the golf course superintendents position, is that of management within the corporate structure of industry. When I say management, I am not talking about the top position, but the area called middle management. The middle manager is the one who sees that things get done. He is also the first one to be let go if top management sees fit. How does this fit the golf course superintendent? At most clubs you have a change in the board very year. The Board of Directors are by comparison, top management. You may say, "I am responsible to the Chairman of the Green Committee". Don't forget, he also works with the board. You have to do the job that pleases them, as well as the membership.

In comparison to middle management of industry the Golf Course Superintendent position is of a less secure nature. This is mainly due to the frequent change of the Board of Directors. Also the consideration of the membership that has to be pleased. All it takes is one person to

get the "snow ball" rolling. The superintendent must maintain an excellent rapport with every one involved in the decision making process.

In talking to three different division offices of the State of California Industrial Relations Department and a management firm, there is little, if any, so called job security in our profession ---to be continued.

+++++

Elected at the annual meeting for 1978 are

President - Robert E. Livesey, CGCS

Vice President - Grady L. Simril

Secretary-Treasurer - Norm Stewart

Directors - Stanley Burgess  
Leonard A. Walsh

Remaining on the Board - Directors Sansara "Jack" Jagur, Robert Uhland

William H. Nigh, past president

President Livesey has appointed the following committees

Editor "Thru the Green" - Stanley Burgess

Membership - Grady Simril, Chairman, Stanley Burgess

Christmas Party - Jack Jagur

T.A.R.P. - Cliff Wagoner

Program - Cliff Wagoner and Leonard Walsh

Remember the Board needs your help to make the Association a success.

RESEARCH - As we all know, there is a never ending search for turfgrass for golf courses. Some of the characteristics that are looked at in a new turfgrass. Does it have the greenest blades and the finest texture, while growing at a modest pace. Will it hold off Poa annua? How well does it hold up to insects, and the chemicals that are sprayed on it month after month? Will it keep its color during the 90° plus temperatures? It should be strong, but yet not strong enough as to take over the grasses in the surrounding area. When a new cultivar comes out, no seed company or university will claim that it will have all of these characteristics.

Dr. Joseph Diuch of Penn State University started work on a new strain of bentgrass for putting greens in 1960. The new cultivar will be introduced this fall. The new turfgrass will compete with Penncross
