

Every year the Class F members have supported the Christmas party with a donation. Don Naumann, T & T Distributing, One First Street, Los Altos, CA 94022 has accepted the responsibility of collecting. The post office doesn't believe that Don works here so he has been having problems with the mail being delivered. It keeps being returned. Don hopes it has been cleared up, but if you are still having problems mail it to the office GCSA of Northern California, 1233 Kansas Avenue Modesto, CA 95351 and I will see that Don is notified. We thank you all very much.

+++++

MIKE CLARK, Golf Course Superintendent of Oakmont Golf Course, Santa Rosa reports that he has hired a new assistant. His name is Rick Hansen and he was formerly an assistant at Oakmont CC in Glendale, and Superintendent at Imperial Golf Course.

George Finnin says he does mostly traveling to England, France, Italy, Austria, Germany, Netherland, Scotland and Ireland a trip on the Mississippi Queen. In 1980 he was in Canada. In the winter spends a month or two in Southern California or Arizona. In spring of 1980 made a trip to the University of California hospital in San Francisco for a few days and then to the radiation laboratoy in Berkeley for 10 days for radiation treatment on a malignant tumor on my eye. So far things seem to be alright. Hope things are still alright. George now lives in Reno, Nevada.

William Martindale from Sonoma says "taking it easy".

We would like to know what any member is doing work wise, traveling, etc. Just drop a note on a card and let us know. It will be published

Thanks to Dave Garcez (a friend of the Wagoner's) for doing our Christmas cover. Think it is really neat.

Places are needed for meetings - Contact Joe Andrade work 916 487-9215 Home 916 331-3325

1981 Dues are now payable. Still working on membership cards.

COMPLETION of Steve Taylor's article. No matter which side of the specification a person finds himself, it is very important to remember that there is a lot of very hard work required on both sides. There is a need from both sides to work together to acquire and manufacture the best possible piece of equipment for the specific job.
