

## A GOLFER'S BIBLE

A ball striking a tree while in flight shall be deemed not to have struck a tree unless the player making the stroke declares that it was deliberately aimed for. In this case, play shall cease momentarily while his partners congratulate him on his marksmanship. But if the player attests in good faith that it was in no sense his intention to strike the tree, then it is obviously a piece of bad luck that has no place in a scientific game. No penalty shall accrue to the player, who is therefore permitted to estimate the distance his ball would have traveled, and to play the ball from that position.

### DO YOU REMEMBER?

Axil - the point where the leaf grows from the stem.

Auricles - projecting arms of a grass leaf, located at the collar, which may or may not clasp the stem.

Whorl - a circular arrangement of three or more leaves or flowers around a single plant

Turgidity - the expansive force in a blade, caused by the presence of water, permitting it to stand erect.

Pustules - a small blister-like elevation found on grass blades and generally associated with fungi.

Petiole - the stalk which supports the leaf.
