

GOLF REPORT - Christmas - Mike Clark, Golf Chairman

For our Christmas golf tournament we had beautiful weather and a challenging golf course. Everyone seemed to have had a good time and that is the desired result.

I again thank Larry Lloyd and his staff for their effort in preparing the golf course for our group. My thanks to Murray Nonhof for completely taking care of the putting contest.

TURF MANAGEMENT FOR GOLF COURSES written by turfgrass researcher Dr. James B. Beard and sponsored by the United States Golf Association, is the newest and most comprehensive reference and "how-to" book concerned with the culture and management of golf turf.

The book, a detailed, well-illustrated work that was eight years in the writing, emphasizes the application of basic turfgrass principles to golf course turfgrass culture. In preparing the book Dr. Beard, Professor of turfgrass science in the Department of Soil and Crop Sciences at Texas A & M University, was assisted by the staff agronomists of the USGA Green Section, headed by then-National Director Alexander M. Radko, and by seven golf course superintendents representing the various climatic regions of the United States.

The 660-page, hard-cover edition, which contains hundreds of easy-to-read line drawings, graphs, illustrations and photographs, provides a handy reference tool for golf course superintendents, golf club officials, course owners, green committee chairmen, golf course architects, novice golf course workers and student of golf course turfgrass culture.
