TURF MANAGEMENT FOR GOLF COURSES written by turfgrass researcher Dr. James B. Beard and sponsored by the United States Golf Association, is the newest and most comprehensive reference and "how-to" book concerned with the culture and management of golf turf.

The book, a detailed, well-illustrated work that was eight years in the writing, emphasizes the application of basic turfgrass principles to golf course turfgrass culture. In preparing the book Dr. Beard, Professor of turfgrass science in the Department of Soil and Crop Sciences at Texas A & M University, was assisted by the staff agronomists of the USGA Green Section, headed by then-National Director Alexander M. Radko, and by seven golf course superintendents representing the various climatic regions of the United States.

The 660-page, hard-cover edition, which contains hundreds of easy-to-read line drawings, graphs, illustrations and photographs, provides a handy reference tool for golf course superintendents, golf club officials, course owners, green committee chairmen, golf course architects, novice golf course workers and student of golf course turfgrass culture.

Dr. Beard has authored four other books: Turfgrass: Science and Culture, Turfgrass Bibliography, Introduction to Turfgrass Science and Culture - Laboratory Exercises and How to Have a Beautiful Lawn.

Turf Management for Golf Courses is the third in a series of turf-related books sponsored by the USGA. It is not a revision but a completely new text. In 1917, the USGA sponsored the first book on golf course turfgrass culture, Turf for Golf Courses, by Charles V. Piper and Russell A. Oakley. In 1950 Turf Management, by H. Burton Musser, was published under USGA auspices, it was revised in 1962.

Turf management for Golf Courses, published by Burgess Publishing Company of Minneapolis, Minn., is available to the public for \$46.75 postpaid. To order, contact the USGA, Golf House, Far Hills, N.J. 07931
