# Why Horizon?

## Horizon is the only professional distributor to offer:

- Complete line of professional fertilizers and soil amendment products
- Full selection of chemicals including post patent products
- Greens-grade seed from Seed Research of Oregon
- Greens-grade organic fertilizer from Sanctuary
- Quality line of soil surfactant products from Aquatrols
- Pond solution products from Becker Underwood and Bioverse
- Ready-to-deliver allied products, including pipe, fittings and wire
- Knowledgeable, experienced team of sales professionals with the skills to carry you from construction through renovation

From products to people, Horizon delivers a service unmatched in the industry – our dedication to doing whatever it takes, every day, to make your job easier.

## PEST CONTROL NETWORK ADVISER WORKFORCE AGING, DWINDLING

*By Harry Cline, Farm Press Editorial Staff*

The graying of America is on a collision course with the feeding of America.

One of the key elements in California's ability to feed millions in American and around the world from its 350 crops producing \$32 billion annually in food and fiber products are the state's 4,100 licensed Pest Control Advisers.

Members of the Western Plant Health Association heard recently that this network of state-licensed PCAs who monitor and recommend pest control measures are mostly baby boomers facing retirement. There are few young people now in the profession to replace them. The industry is stepping up its efforts to recruit PCAs from colleges and universities.

Terry Stark, executive director of the California Association of Pest Control Advisers, said a survey of CAPCA's 3,100 members revealed that almost 40 percent of its members are over 55. Only 17 percent are 44 or younger. Thirty-five percent are 45 to 55.

Twenty-five percent of CAPCA members have more than 30 years experience. Over half have more than 20 years of experience.

The PCA demographic survey released by CAPCA earlier this year put statistics to what people like Les Lyman of the Tremont Group already knew: It has become increasingly harder for retail pesticide and fertilizer dealers to hire qualified PCAs.

Lyman shared the labor panel with Stark and Jennifer Ryder

## PEST CONTROL NETWORK ADVISER WORKFORCE AGING, DWINDLING

Fox, the new dean of the college of agriculture at California State University, Chico. Fox held a similar position for four years at her alma mater, Cal Poly, San Luis Obispo, before moving to Chico earlier this year.

California's annual agricultural production income ranks first among all states and is twice that of the next closest state. If ranked separately, California's agricultural economy is the fifth largest in the world, behind only the United States, the European Union, China and Brazil.

California exports almost a fourth of what it produces. Exports total more than \$8 billion annually.

It is also the most regulated agricultural industry in the nation. The California Department of Pesticide Regulation-licensed PCA is an important cog in maintaining the state's farm productivity while keeping the regulatory process running smoothly through mandatory written recommendations for crop protection measures. Many PCAs also make nutrient recommendations.

Sixteen percent of today's PCAs work for distributor/retailers versus 26 percent in 1999. Twenty-two percent are independent PCAs. Seven years ago, 14 percent were independent. There are fewer government agency/municipal PCAs (19 percent in 2006 vs. 25 percent in 1999) and about the same percentage of basic manufacturer PCAs (15 percent) and in-house PCAs (17 percent) as there were seven years ago.

Lyman has been the owner of independent ag chem retail outlets for many years.

"There is a diminishing labor pool. It is getting increasingly difficult for the independent retailer to find and keep good people," Lyman said.

Lyman believes promoting within; solid training programs; and empowering people to make decisions are ways to keep

good PCAs.

"Promoting and rewarding teamwork is important in keeping good people. An open-door to management is also critical," he said.

All three panelists agreed that college recruiting and even introducing young people to California agriculture in high school and elementary schools is where the industry will find the new generation of PCAs.

Stark, who has been on the job a little more than a year, says CAPCA has redoubled its efforts to reach out more aggressively to community colleges and four-year universities to entice students to follow curriculums that will lead to qualifications for taking the PCA exam.

"We have to enhance our visibility and attract new professionals to our industry," said Stark. "Many students really do not what they want to do. It is up to us to help them make choices."

CAPCA now offers free student memberships if the student is enrolled in course work related to becoming a PCA. College recruiting dinners are being revived.

Fox, a Cal Poly plant sciences graduate, promoted a curriculum there when she was the dean of the ag college. She is doing the same thing now at Chico State, where the ag college attracts mostly animal science majors.

At Cal Poly there is a curriculum that will lead to qualifying to take a PCA exam, and she hopes to install the same program at Chico State. One of the problems with getting graduates to become PCAs is that they often do not have the course-work to qualify to take the state-mandated exam.

"Students often find out too late in their college career they do not have the course-work to take the exam," she said. They do not want to return to college after graduation to pick up those credits.

## OFFICE NOTES

Barbara Mikel

I very much enjoyed his blog's coverage, interviews, photos, and streaming media of the U.S. Open at Torrey Pines! If you haven't already visited this feature, give it a click. <http://gcm.typepad.com/gcm/> or you can link to it from the GCM home page (From the desk of GCM) Scott had a great local "superintendent interest story" posted about the U.S. Open at Torrey Pines. Next time you see Cord Ozment, CGCS of Callippe Preserve GC, ask him how he talked his wife Allison into taking on the "extra curricular actives" at Torrey Pines!

## GCSANC Ball Mark Repair Education Program has Presence at Women's Golf Event

sharing information about ball mark repair," stated Cook, "especially since many of the participants are taking up the game for the first time and are interested in learning all they can about the sport".

The *Business Golf for Women Day* included a clinic, guest speakers, followed by lunch and a 9-hole tournament. The day wrapped up with a networking reception. This is the second year the GCSANC has supported Women's Golf Week, which is affiliated with Play Golf America, the industry-wide initiative designed to bring new players to the game and former players back to the sport.

**We sadly note the passing of Bob Swain, La Selva Consultants, Inc. Bob was battling cancer for some time. Sandy, Bob's wife, will be continuing business operations for La Selva Consultants, Inc.**

## root PRUNER

- CUTS ROOTS -
- DRAINS WATER -
- NO CLEAN UP -

Prunes roots up to 5" in diameter with a maximum depth of 10"

ROOT PRUNER IS THE REMEDY FOR REDUCING TURF DECLINE CAUSED BY COMPETITION WITH TREE ROOTS FOR WATER. EASILY AERIFIES TIGHT NARROW AREAS.

### WEST COAST TURF HEADS SOUTH OF THE BORDER

paspalum variety and our experienced installation crews. We've been here before, and have worked with a lot of the builders and contractors already so there aren't too many surprises. There is definitely a need for high quality sod and grassing services in Baja, and we're glad to be able to fill that need," Stafford said.

West Coast Turf is a full service sod grower and installer with six Western U.S. locations: Palm Desert, CA; Las Vegas, NV; Stevenson, CA; Winchester, CA; San Marcos, CA, and Tempe, AZ. Sister companies Western Sod and Western Sere (hydroseeding, hydrotolonizing, and native revegetation) are also located in Tempe, AZ.

West Coast Turf de Mexico is located in Los Planes, BCS, Mexico. The companies offer more than 20 different varieties of turfgrasses, along with services such as world-wide shipping and expert installation. For more information visit [www.westcoastturf.com](http://www.westcoastturf.com) or call 800/447-1840 ext. 301.

### PRESIDENT'S MESSAGE

fun in the previous sentence, as that is what the committee is really trying to bring back to the events. The golf venues are spectacular and conditions promise to be excellent for the players. Seeing all the thought and effort that gets devoted to these golf events on our behalf by GCSAA staff is amazing. It makes me proud to be a member.

So flip your calendars forward and mark the dates! We too have some really fun events on the horizon, the Cliff and Myrtle Wagoner Scholarship and Research Tournament, the Institute, the Annual Meeting, and the Gulf Shores GCSAA Championship. Somehow the passage of time does not seem near as daunting when viewed with these events in mind.
