Words of Wisdom

By Jim Hermann, CSFM

Once there was a young bull and an old bull grazing up on the hill in the meadow. The young bull says to the old bull “come on, let’s run down the hill, break down the fence and talk to one of those pretty little heifers in the next pasture” the old bull looks over at the young bull and says “how about if we walk down the hill, go through the gate and talk to all those pretty little heifers”? The young bull had knowledge. The old bull had experience and wisdom.

As sports field managers, we strive to acquire knowledge in our specific field of endeavor. We go to classes, field days, read books, articles etc. Wisdom is acquired when we begin to apply the knowledge we have gained. Wisdom could be considered a deeper understanding acquired through experience as it applies to our specific circumstances. It was once said, “knowledge is organized science, wisdom is organized life”.

Ironically, we tend to gain more wisdom from our mistakes than from our successes. What doesn’t work is sometimes more meaningful than what does. With this premise in mind, I would like to provide you with words of wisdom. Obviously, these mistakes were the product of others and I was merely an observer. “No bull”

- When calibrating a pendulum type fertilizer spreader don’t forget to divide the rate needed by 2 to compensate for the overlap. Or, “sharpen your mower blades”.
- Don’t till with a nitrogen source that relies on microbial action for release in the late fall and follow up with water-soluble nitrogen in spring unless you take that application into consideration. Can you say “double whammy”.
- Don’t use a compression fitting to repair a 3”main line irrigation leak in the vicinity of an above ground elbow. You would be astonished at how high in the air that fitting can fly when 80 pounds of air pressure causes failure of the connection to occur during system winterization. Someone told me, it sounds like a bomb going off.
- Be sure to tie down equipment on your trailer when transporting from site to site. Bounce is not a consideration when comparison-shopping.
- Never try to load a backhoe on a trailer with a 2 5/16” ball hitch connected to a truck with a 2” ball. It just doesn’t work.
- Never use a highly volatile ester formulation when applying lawn weed control in the vicinity of prize roses. Some roses are very expensive.
- Never use a nonselective granular herbicide where it has the potential to translocate into desirable turf when it rains. It can take over a year for the grass to grow back.
- If a rag is used to protect the exhaust manifold of a vehicle when adding engine oil, remove the rag before operating the vehicle. Or, use a nonflammable material to protect the manifold.

The Board of Directors of the Sports Turf Managers Association (STMA) has selected Kim Heck as Executive Director. Heck comes to STMA from the Golf Course Superintendents Association of America (GCSAA) where she spent the past 10 years directing key programs and services for the 20,000-member organization. Under her leadership an entire functional area was created to help members attain career success. She was an integral member of the GCSAA management team and has worked with many member committees to advance initiatives. Prior to joining GCSAA, Heck worked in marketing and advertising. She holds a B.S. in Journalism from the University of
Kansas and resides in Lawrence, Kan., where she volunteers on several community boards and advisory groups. “I am excited to be given the opportunity to work with STMA’s strong, visionary board and committed volunteers. I truly believe that STMA is poised for greater growth and influence in the sports and turf industries. My goals are to strengthen membership by providing highly valued services and to continue to advance recognition for the profession,” Heck says.

Heck begins her position Sept. 1 at the new STMA headquarters, which will be located in Lawrence, Kan. STMA is the professional association for sports turf managers from around the world. Members keep abreast of the latest research and technology and apply their knowledge and expertise to provide the highest quality playing fields for athletes. For more information on STMA, consult its website at:

"JUST ADD WATER..."

Like part of any good recipe, the proper amount of water at the right time will enhance and protect your turf.

Don't let an automatic underground sprinkler system be your facility's missing ingredient.
