

USGA FUNDS MILLIONS OF DOLLARS OF TURF RESEARCH TO BENEFIT GOLFERS WORLDWIDE

BY COLE THOMPSON | ASSISTANT DIRECTOR, GREEN SECTION RESEARCH

- USGA-funded research produces unbiased information that helps superintendents and golf facilities make sound, sustainable decisions.
- The USGA has awarded more than \$40 million to universities in support of turf and environmental research since 1920.
- In 2018, the USGA supported 85 research projects across the country by providing a total of \$1.8 million of funding.
- Summaries of USGA-funded research projects are available [here](#).

The USGA funds research projects that have the potential to improve golf course management and the golf experience through the Turfgrass and Environmental Research Program. Key priorities of the program include developing improved grasses and identifying resource-efficient management practices. It is through these priorities that the USGA works to protect the long-term viability of golf by optimizing
