Growing Pains

We are in business in east-central Illinois and are subscribers to Weeds Trees and Turf. We have been considering branching out into the lawn field and would like to have some information.

What we are primarily interested in, at the present time, is the type of pumping equipment necessary for general lawn treatment. We are mainly considering the application of insecticides, fungicides, and herbicides, and are wondering what type of pump is the most suitable and what type of storage capacity is necessary.

We prefer a pump driven either by an electric motor or gasoline engine and not one mounted to PTO. Please give us recommendations on pressures and gpm.

R. Morton Blair
The Dorite Company
Charleston, Ill.

We cannot in fairness make recommendations of specific equipment without getting involved in technicalities over which we have no control. However, we suggest reference to our December 1964 issue, in which a Supplier's Guide lists everything mentioned above. Inquiries to manufacturers will bring all the necessary information.—Ed.

Bomardier Address

Would you please oblige us with the address of the Bomardier Snowmobile, Ltd., of Canada? We are very interested in their unit. Of course, we are subscribers to your informative and helpful magazine.

Neil A. Euting
President
Midwest Aquatic Service, Inc.
Oconomowoc, Wis.

The address of Bomardier Snowmobile, Ltd., is Valcourt, Quebec.—Ed.

Supports Association Idea

I am a commercial weed control operator working in northern California and have read the article about the proposed national association for the custom spraying business. It would seem that this is a step in the right direction, and I would be interested in such an organization.
