Daymon points out that nearly 30 years of sod experience contributed to the new product line, which is topped off by the Daymon Sod Roller, said to be able to roll up to 1,500 yds. per hour under average conditions. Daymon established its first commercial sod farm in 1938, now owns and operates the mechanization-minded 1,300-acre Emerald Valley Turf Nursery near Fowlerville, Mich.

Solo 635 Chain Saw Has Increased Cutting Power

Increased cutting power, minimum vibration, and easy starting are said to be features of the new model 635 chain saw from Solo Industries. Design extras include die-cast magnesium casing and hood, the latter readily removable for access to spark plugs, carburetor, and air filter. Quality carburized steel is used in the crankshaft, which will withstand excessive rotations, Solo says. Aluminum cylinder has a fused-in steel sleeve that can be reground as necessary. Weighing 22 lbs. without bar, 635 has automatic lubrication coupled with a manual hand pump system.

Solo also manufactures the lightweight Combi gasoline engine, now offering 4 1/2 hp. Combi is a detachable unit that can be used to power several equipment items interchangeably, including chain saw, lawnmower, garden tiller, water pump, and outboard motor. Further data on these products is available from Solo Industries, Inc., 5100 Chestnut Ave., P. O. Box 1728, Newport News, Va. 23606.

Solo 635 chain saw weighs 22 lbs. without bar, which is available in 17, 21, and 25-in. sizes. Hood and casing are magnesium.
