The Cover

When in rugged tree country, travel as loggers do, Mobley Company right-of-way maintenance contractors discovered. This Kilgore, Tex., firm tried four-wheel drive trucks but had to call on the loggers to pull them out of mudholes once too often. As a result, Mobley Company customized a logging vehicle built by the Franklin Equipment Co., Franklin, Va., to navigate the tough pipeline and utility right-of-way terrain in Southeast Texas. Mobley had to devise a new spraying technique also to reach the tall trees. With invert emulsions, spray can be placed accurately up to 100 feet. The story begins on page 6.
