Mass Nursery Marketer Has Place In Industry

"The mass marketer holds a legitimate and important place in the nursery industry, and, in the long run, will exert a healthy influence on that industry," said Robert F. Lederer, executive vice president of the American Association of Nurseriesmen.

"I have discovered that a great number of people look on mass marketing, multi-outlet retailers as some sort of mysterious threat. Some retailers seem to consider them a dangerous kind of competition; some wholesale growers consider them a complicated, demanding disturbance in their traditional distribution pattern. But as one grower said to me, 'It surely doesn't make sense to put your head in the sand and hope they'll go away.'

"The garden center operator can learn some good things the mass marketers are doing which he can add to his own kind of operation. And he can learn what the mass marketers can never offer their customers which will set him apart as a dominant influence in his own sales situation," Lederer said.

A survey, conducted by the association of multi-outlet retailers and wholesale growers, showed that mass marketers prefer to deal in a limited variety of plant materials...most priced at $10 and less. Garden center operators should not ignore that part of the market, cautions Lederer, but it is certainly not where the big action is. The major purchases, the landscaping advice and service, the planting instructions and materials to go with it all are the business of the traditional garden center. In that respect, there is just no competition between them and the multi-outlets.

This same survey produced some interesting facts for those wholesale growers who want to expand their sales into the mass marketing field. "If the grower does want to build that part of his business," points out Lederer "he has to listen to what the mass marketer wants. They want better record keeping of sales and demands, with information made available to them as they make their purchases. They want to handle materials they purchase, labeled at the source. They want the industry to provide them with sales training and maintenance training materials. They want, probably more than anything else, an improvement in delivery arrangements and procedures."

"What can the mass marketer learn from all of this?" asks Lederer. "That he is a part of the nursery industry and shares its problems, and that it is about time he began to feel a part of it. He has much to gain by tying in with others in the industry to help solve some of our problems. He has much to offer. He should serve on committees and join associations. The nursery part of the business can be the most profitable if he will treat it properly, staff it adequately, and watch it carefully. After all, he has joined the industry that offers the public 'Nature's Gift' and 'Green Survival' and, in part, it does 'depend on him.'"

Wholesale growers in the nursery industry have an important, demanding, lucrative market for the sale of their products to the multi-outlet operations — without sacrificing any of the quality and service they provide to nursery garden centers. Nursery garden centers profit from the sales stimulation provided by the advertising and point of purchase availability of certain nursery products through mass marketers, and profit from some of the marketing techniques developed by the multi-outlets, without losing their competitive advantage.

"Multi-marketers do not represent a threat at all in the final analysis," says Lederer, "but a beneficial step in the progress of the total industry."

Chemical Weed Control Results In Cleaner Air

Use of chemical weed control is resulting in cleaner air and a better environment, reports Dr. Walter Gould, weed physiologist with New Mexico State University, Las Cruces.

Gould's research on brush control in New Mexico has shown a dramatic reduction in blowing sand where good brush control has been obtained. The amount of blowing sand collected in sand traps in un-sprayed mesquite has been about 20-fold greater than the amount collected in continuous areas where the mesquite has been controlled.

Formerly good grassland has turned to mesquite sand dune sites with extensive areas of nearly barren ground between the dunes, Gould explained. These areas are a source of blowing dust whenever the wind velocity exceeds 20 miles per hour.

Controlling the mesquite with aerial applications of 2,4,5-T at low rates has permitted perennial grasses and annual forbs to grow between the sand dunes. This plant growth reduces the wind velocity at the soil surfaces and reduces the amount of blowing dust.

HELP WANTED

SUPERINTENDENT OF MEMORIAL PARK A leading midwest cemetery organization desires the services of a high caliber person with capabilities and standards that will justify earnings of $15,000 to $18,000 per year. The position requires the ability to hire, supervise and train personnel in handling the internment service, maintenance of turf, nursery, buildings and fleet equipment and in land development. Proven ability necessary in labor supervision and relations with the public. Close communication with management will provide the support necessary for success. Send on-hand written resume, in detail, of the above mentioned subjects that would indicate your practical experience. Box 114, Weeds, Trees & Turf, 9800 Detroit Ave., Cleveland, Ohio 44102.

GREAT OPPORTUNITY FOR THE MAN WHO LIKES TO BE HIS OWN BOSS!

National leader in tree service, operating from Maine to Florida, offers excellent opportunity in sales and management. Ability to work with public and personnel is important. Must be experienced in tree work or horticulture. Excellent starting salary, expenses and fringe benefits. Intensive training course and outstanding growth potential. Send resume of experience or educational background to:

WILLIAM ECKHARDT
BARTLETT TREE EXPERTS
2770 Summer Street, Stamford, Conn. 06905

Rates: All classifications 50¢ per word. Box number, $1. All classified ads must be received by Publisher the 10th of the month preceding publication date and be accompanied by check or money order covering full payment.

C/A Weeds Trees and Turf, 9800 Detroit Ave., Cleveland, Ohio 44102.

When answering ads where box number only is given, please address ads to Box number, c/o Weeds Trees and Turf, 9800 Detroit Ave., Cleveland, Ohio 44102.
