1975 State Pesticide Leaders

Final publication of State Plans for Certification of Applicators was made on March 12, 1975 in the Federal Registrar. The job is now up to each state to submit plans and proceed with certification of all applicators. Unless a farm operation is involved, you will be certified as a "commercial applicator."

Your state is probably working on certification right now. Some state fees are high (up to $60 yearly) and some states take a tough stance. And this makes reciprocity with other states rather difficult.

You should be aware of developments in your state. A list of state leaders is provided for your information. Contact them for further details or status of legislation and certification plans in your state.

Three months of heavy emphasis on equipment in the green industry. The July, August and September issues of WEEDS TREES and TURF will carry more features, more data, more photographs on equipment than ever before. Rolling stock, engines, tree care and sod equipment, golf cars and course maintenance equipment, tractors, trucks and hand tools. Watch for the biggest green industry equipment rally ever held.

"Without Laval Separators, we couldn’t have opened for the winter season.”

Perini Land & Development Company
West Palm Beach, Florida

“We were nearly finished with the North Course at the President Country Club. It was critical that we grass immediately to insure play by the coming winter season.

“But we had trouble with sand in our wells. So much sand was entering the electric solenoid control valve that our irrigation system wouldn’t function.

“We called on the Laval Separator distributor in our area. They installed two six-inch 600 gpm industrial separators.

“The separators did their job. In fact they did so well, we even bought two more for our South Course. And we’ve had no further sand problems.”

Laval Separators, from 3-4100 gpm, will remove up to 98% of all particles as small as 200 mesh (74 microns). If you’ve got a problem with sand, call on Laval.
