CULTIVATED sod growers visited producers in the Kansas City area this year for their American Sod Producers Association annual convention. They saw sod being produced during some adverse dry weather along with many different types of demonstrations tied to management.

Most unique was the Weeks Sod and Walnut Farm where sod is grown between rows of trees in the Briggs walnut orchard which is a most unusual double cropping system. Weeks claims to have the only walnut orchard in the nation and reports it is highly successful. He finds a demand market for walnut hulls and the walnut meats are also readily salable. He also grows some sod for market in addition to the orchard acreage.

The Latta-Scholes, Inc., sod farm was the site of ground preparation, seeding and maintenance equipment demonstrations. Other demonstrations on both harvesting and cultural practices were held at the J. L. Harris Sod Farm, where Harris alone handles 80 acres; the Meyers Turf Farms which is a major operation of more than 1000 acres including some zoysia and general farming; and the Mell Briggs Turf Farm featuring harvesting and irrigation.

Membership as announced at the July 17 business meeting is now 300 and demonstrates significant growth for the association. Gerry Brouwer, Brouwer Sods, Ltd., Keswick, Ontario, Canada, has served as membership chairman and introduced his “key man” group of member recruiters. A “key man” is appointed in each state to solicit members on a personal basis and the program has proved highly successful in
most areas.

Election of directors at the business meeting and officers by the board included Norman LeGrande, Hendricks Sodding and Landscaping, Lincoln, Neb., as the new president. LeGrande previously served as a member of the Board of Trustees and was the board Liaison Director for the 1975 convention. Vice-president for the upcoming year is Charles Lain of Pine Island Turf Nursery, Inc., Sussex New Jersey. Glenn Rehbein, Circle Pines, Minnesota, will serve as secretary, and Tom Thornton, Thornton’s Turf Nursery, Elgin, Illinois, is the newly elected treasurer.

New members of the Board of Trustees include; Glenn Rehbein; John Hope, Manderly Turf Farms, Ltd., North Gower, Ontario, Canada; and Charles Davis, Wharton Turf Farms, Wharton, Texas. Davis is the retiring A.S.P.A. president.

Plans were also announced at the meeting to hold their annual mid-winter conference on the gulf side of Florida, February 5-6, 1976. The Sheraton Sand Key Hotel in Clearwater will serve as the meeting headquarters.

Control your fungi problems

FROM TEE TO GREEN

Use Terrazole®

To Fight Cottony Blight, Grease Spot, Damping-Off

Terrazole soil fungicide is your best weapon against Pythium fungi—the cause of grease spot, damping-off and cottony blight in your turf.

With a case of Terrazole in your storage shed, you’re set to act fast at the first sign of these turf diseases. Terrazole goes to work quickly and provides effective control of the problems caused by both Pythium and Phytophthora. Repeating at 5 to 10-day intervals provides preventive control. Keep your best weapon against Pythium on hand. Keep your greens green, your golfers happy.

Use Terraclor®

To Control Brown Patch

Terraclor soil fungicide is the answer to Rhizoctonia control—the fungus that contributes to the formation of Brown Patch in Southern turf grasses.

Terraclor is easy to apply in liquid or dry granular form. Usually one application at the first sign of disease is all it takes.

Be sure you have Terraclor on hand. It’s good assurance for healthy fairways and greens.

Write for complete information.

Mr. D. H. Sparks, Agricultural Division Olin, P. O. Box 991, Little Rock, Arkansas 72203

Please send me more information on Terrazole/Terraclor for a healthy turf.
