Faster, easier and more economically
than ever before, Vermeer Log
Splitters take the work out of making
firewood. A single control lever
activates the powerful overhead
cylinder, hydraulically wedging
a heavy-duty cutting blade
through any log up to 30" in
height — under 22,000 lbs.
of splitting force. You can split, stack
and have a truckload of firewood
ready for delivery in an hour. Easy to
operate. Easy to maintain.
Powered by the hydraulic system
of a farm tractor (LS-100) . . . or
available as a self-contained unit
(LS-200). Vermeer Log Splitters
are ideal for parks, campgrounds,
tree farms, nurseries and rental
operators. Write today for complete
information.
