HELP WANTED from page 90

REGIONAL LANDSCAPE MANAGER for national company to operate throughout Florida. Can be headquartered in Ft. Lauderdale area. Experience requirements: history of management of large community landscape facilities; degree in ornamental horticulture or horticul-

tural management and/or equivalent education or on-job training; experience in creating maintenance procedures and schedules; experience in teaching and dealing with landscape crews; history of operating on independent basis and developing realistic schedules for independent action. Salary open. Please call Mr. Carpenter (305) 972-8530.

PROTECT NEWLY SEEDED AREAS FROM WIND AND WATER EROSION WITH TERRA TACK

Terra Tack used in any hydrograsser or hydroseeder provides erosion control for newly seeded areas or any other soil surface needing erosion protection. Terra Tack after application forms a water insoluble gelatinous crust, locking the seed and mulch to the soil. This invisible crust is, however, porous enough to permit moderate rainfall or irrigation water to soak into the soil, while excessive water runs off. Terra Tack also reduces soil moisture evaporation. When added in the same tank along with a slurry of water, seed, mulch, fertilizer or other compatible soil amendments, Terra Tack, in most cases, eliminates the need for two applications, separate equipment and extra manpower.

Versatile Terra Tack can be used with straw, hay or wood fiber mulch.

Straw or Hay Mulch

Terra Tack when applied as a direct spray to straw or hay mulch helps prevent wind and/or water displacement of the mulch and seed.

Wood Fiber Mulch

Terra Tack when combined with fiber mulch, seed and water acts as a complete binder helping to lock the protective mulch blanket to the soil.

Grass Growers
424 Cottage Place, Plainfield, NJ 07060

Proven over 15 years

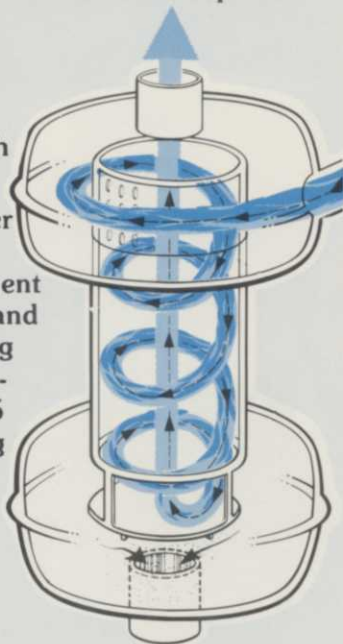

A better way to remove sand from water.

The Old hydrocyclone (left) did a good job. But our separator (at right) is better. No high speed abrasion. No plugging the apex. No screens or filter elements to clean or replace.

No downtime or routine maintenance. No continuous loss of water and no high pressure losses.

It's simply a better way to protect irrigation equipment and pumps from sand and grit by removing up to 98% of all particles as small as 325 mesh. There's nothing else quite like it.

deserves a new name all its own.

It just seemed the easiest way to make sure you won't confuse us with anyone else. So now it's Lakos Separators instead of Laval Separators. Same people . . . same dependable equipment . . . new name. Through four generations, 39 patents and spanning over 100 years, the Laval family name is still one you can trust . . . now in sand separation with Lakos Separators. Free literature and the name of your nearest distributor are yours for the asking.
